Bear cycle that has started After Jup, Sat & Nodes transits in Mid & End of April, given a great shock by retrograde Mercury this week, same pattern is seen for Venus as well, both gives great fall. It usually stops when Slow moving planet like Ju & Sat attains Stationary motion.

As both the planets have higher accerlerations whenever they get contact under Sun, thats the reason as soon as mercury attains the retrograde motion it has fasten the bear cycle.

Wait for venus to conjugate Rahu in Aries & Mercury to attain direct motion to get slight revive from these shocks , temporarily from 23rd May to 4th June onward.

Stability & Balance in market would be seen from 5th june to 9th June onward.

* Typo 5th June to 9th July onward
