Many have asked how to plot ratio charts on trading view, here is an example , suppose you want to see Maruti/Nifty auto:

1. Type the code of these two scripts exactly as shown in TV without any space and use NSE before it

NSE:MARUTI/NSE:CNXAUTO

2. Press enter

> (10) Ratio chart (daily) of Auto Index/Nifty
>
> Taking multiple support at crucial level
>
> Autos could start outperformance over nifty as long the support holds , and more fiercely once resistance breached #PB365 pic.twitter.com/ZRSmtGH1ic
