How old traders from Gujarat view muhurat trading?
They give lots of importance to High and low of muhurat trading day
Anything trading above high of muhurat trading.. will likely to remain bullish till Uttarayan (14th January)
Opposite is for trading below low of muhurat trading

Then.. same rule applies for High and low of Uttarayan means 14th January..
Trading above high of 14th January will remain bullish till diwali and trading below low of 14th January will remain bearish till diwali according to view of old traders from Gujarat...

They use the word...
Muhurat ni ken teji ma padi
Or
Muhurat ni ken mandi ma padi...

Same way..
Uttarayan ni ken teji ma padi
Or
Uttarayan ni ken mandi ma padi..
