Dear All,

1. A new year of hope started, I thought to pen some of my views about making money (Investing & Trading), these are the points which I keep telling me & I thought to share with you all. I hope, it will help both all. #investing #investingpsychology #tradingpsychology

2. Equity is a riskier way of making money, but still, the ease of control, liquidity & speculation attracts us all, more adrenalin rush in trading versus any other modes of equity-like MF, ETFs, Small-cases, Longer-term investment. #investing #investingpsychology

3. Everyone comes to equity to become millionaire/billionaire/..., but very few become so, otherwise, most of the analyst would not be running webinars or panel of TV or writing books for regular income.
