■■What is D5?■■

Good question. You aren't likely to find the answer with a Google search. But the key to unraveling what is going on in politics and the world today seems tied up in that mystery.

You think it's accidental Google doesn't provide clear answers? That the mainstream media doesn't talk it? The Q community believes it is a date. December 5th. What happened on that date?

There's a reason why Democrats, and even some Republicans, celebrities, and the media are at open war with Trump. Didn't you ever question why? Do you just accept the News without knowing why?
