@MashraniVivek

**@iancassel Thanks Sir for amazing insights as always.**

**To fight some of these "bad demons" I keep doing experiments like averaging up..**

**Also, during feeling of high PE or market overvaluation, I try not to take profit, but trail exit and give room of 20-35% drawdown to excellent businesses**

@Sanjay Bakshi @iancassel Also, I am experimenting few indicators which will help me re-enter known great business again (even if I exited at lower price) and help remove price anchoring in objective way..

Let's see how it pans out..

But yes... ultimately anyhow we need to conquer these demons ■
