For stocks added to watchlist

1. Save them on charting tool
2. Apply ur technical analysis rules
3. Breaks any rules? Worthy to Delete from watchlist?
3. Apply Fundamental filters per your rules
4. Refine watchlist
5. Wait like a hawk for buy set up!

Scan charts on weekends, make note of buy stocks for upcoming week.

Your stocks to AVOID list [either fundamental or technical] is critical. Else you end up with problem of plenty.

My rule is <50 stocks in watchlist.

Coming next...

How to create watchlist in @moneycontrolcom app using the "Combi scan" in @mystockedge app!

Combi scan allows you to custom create #TechnoFunda screens■
