A monolith has appeared December 5th in Colombia, but unlike the others appearing around the world, this one is Gold■ LETS GO! ■

It was found in Chia (that means thé godess Moon■) Colombia, located in the North of Bogota.

I read about this country and what i have found is that before the spanish conquest of the New World, the belief of the inhabitants of Bogota formed part of the Muisca religion. ■

In the practice of their religion, they used a lot of gold. Ritual tools were "covered in gold" 17■

Eldorado is the name of the tribal chef of the Muisca people. That name come from the spanish "El hombre dorado" The Golden Man■

The legend of Eldorado is that there is a lost golden city, with a lot of gold, and precious stones like diamonds and emerald■ A lot of european people went in Bogota to found out the Gold.

In this place there are nowadays Gold mines but also in Venezuela (El callao) at South of Orinoco river and Amazon brasil.■

Now, since February 24th 2016, a canadian mining company "Orinaca Mining Arc O.M.A. took this area and are digging for Gold. They work in all the gold places Conombia, Bolivia, Venezuela and Brasil...

Since Maduro is in power in Venezuela he made a deal with the Canadian mining company. But this Orinoco company is making a lot of problems over there. They are, for example working Mercury, they force native people to work in the mines, they destruct the UNESCO area■

Venezuela with Maduro and the Canadian company signed a $5 billion Gold mining deal. "Follow the money" ■ https://t.co/HQd4oIQfBD

The Maduro sign a deal with the Gold Reserve. Gold reserve is canadian Company with headquarters in Washington Usa but who owns this Company who puts hand on this gold? Wikipedia dont tell too much■

This is the $billions Venezuela and gold reserve deal ■ It looks like Maduro has sell his country for the Gold ■ that comes from the gold reserve web site

Illegal gold mining is reaching new records high in Venezuela and the destruction of UNESCO world heritage sites■

UNESCO are aware of the crisis overthere but strangly they let mafia, illegals digging, and the destruction of the site! UNESCO is a U.N. group located in France.

Back to the Gold reserve. Thats owned by the World Bank group...like the U.N development group, etc ■

What is happening in those countries is like the blood diamond from Africa and nobody take action they are all like ■ and the illegal mining is made for the jewelry companies. They dont really want to know where the gold or diamonds come from and if the people and childre safe

Gold mining is a crime against humanity!

The U.N. is aware for the amputations, and all the crimes ivre there..but they just tell "that is wrong!" But nobody take actions why?https://t.co/JU699Gt21v

In fact, they made sanctions over Venezuela and Maduro but it is just for the money not the people who are suffering ■■■■

But who keeps the money? That's English Citibank and The german Deutsche Bank. They dont want to recognize Maduro as the venezualian president https://t.co/aT3O1DOEff

The U.N. was a Rothschild and Rockefeller organisation since the traité de Versailles before the world war ■ then UNESCO too, not surprised that they do anything for people! https://t.co/ab9MuDh9mW

James Rockefeller is behind the Citibank that was before the Citigroup

They also helped Epstein for the money laundering and a lot of dark money traffic https://t.co/9RU27OSTva

What did 17 ■said about the Gold?

Look the hour 1:01:15 ->1.2.5= December 5th ■■
