THREAD: TAJ MAHAL REAL HISTORY

In this Thread, I will prove with facts and arguments that Taj Mahal wasn't built by Mughal Emperor Shahjahan

Read it carefully and propagate the information

1) The biggest proof of Shahjahan's taking this building from another rather than building it himself is found in Shahjahan's own official chronicle, Badshahnama (Bibliotheca Indica series of the Asiatic Society of Bengal publication, page 403, Volume I).

Therein he admits that the TajMahal is Raja Mansingh's mansion which, when taken over for Mumtaz's burial. This is an obvious proof that the current history of the Taj Mahal as we know it, that it was built by Shahjahan for his wife, is completely false.

2) Had Shahjahan really conceived and built the Taj himself, description of its construction must had to be mentioned in the official chronicle. Such an event would not have been forgotten by anyone.
Furthermore, if a stupendous monument like the Taj is built, there certainty

would be a burial date that would not go unrecorded. However, the burial date is not only unrecorded, but the date of the time in which Mumtaz must have been buried in the Taj varies from six months to nine years of her death!!

3) Mumtaz being one of many wives of shahjahan never deserves a grand monument (You obviously know how much Izl@m respects women). Even historically there is no record of any special out-of-the-ordinary attachment or romance between Shahjahan and Mumtaz during their life

Thus, the story is just a romantic
concoction to justify the usurping of the Taj Mahal
4) Furthermore, Shahjahan was no patron of the arts. The decorative patterns that cover the Taj are not only entirely of Indian flora but also of sacred Hindu motifs like the lotus

Such "k@fir" characteristics, according to Muslim beliefs, would never allow any peace for the departed souls lying buried underneath

5) Other points to consider include that there is a doorway in the Taj Mahal premises that is kept locked by the Archeological Survey of India. This door leads down a stately staircase to a massive, octagonal, seven-storied water well
Why is it required in a Burial house?

6) Carbon-14 dating of Doorways of Taj Mahal was done by Dr. Evan Williams, Director of the Brooklyn College Radiocarbon Laboratory, provided that even the door was pre-Shahjahan

Similar samples taken from
Fatehpur Sikri also proved that that township, usually attributed to the 3rd-generation Mogul emperor Akbar, is also much more ancient.”
