@StocksNerd

I use 4 scanners:

1) Volatility, Volume & daily range compression scanner
2) Punch-Drunk-Love
3) GE Ratio - to track fundamentally strong stocks
4) Recently created one to track Power Play setups.

I get around 150-200 stocks daily & choose the ones with the most potential.

> Sir, How do u find a set up - Do you track chart of each stock daily ? Or do u have filters , that lead you to a number of stocks , after which you scan them.
