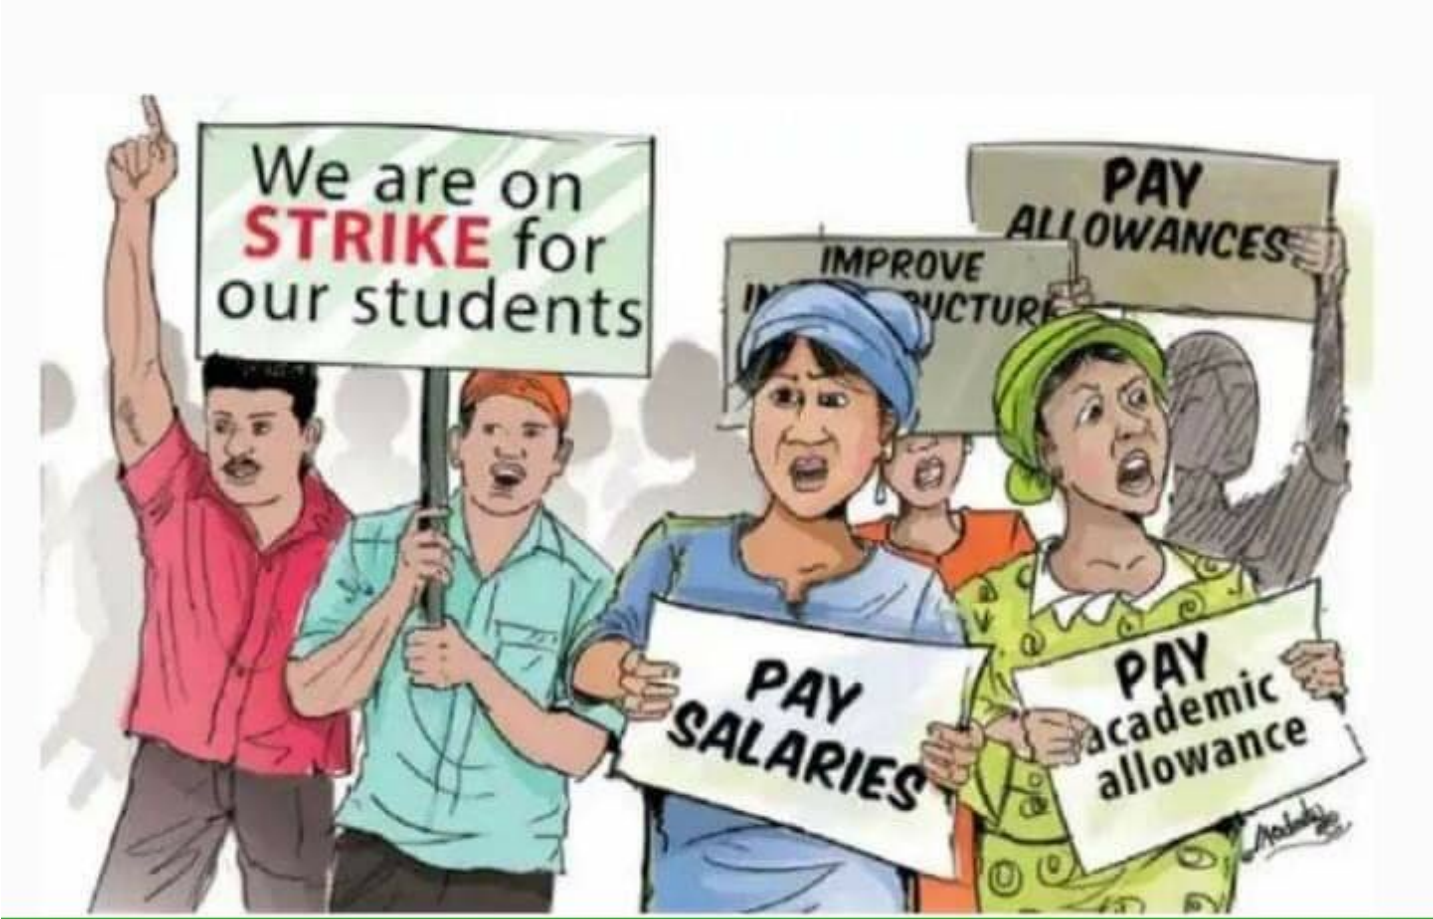
HOW ASUU IS DOING THEMSELVES THINKING THEY'RE DOING ME .....■■
A thread.....



Being a student of a public university,I'm also partaking in the ongoing compulsory sit at home directive given by ASUU.

The last time I entered a lecture hall was in December 2019 (after my 2nd mbbs exam), I hope I'll be able to differentiate spleen from pancreas when school resumes.■

So like most affected student, I didn't want to stay idle doing nothing at home (the errands you'll run,it's preferable you get a job sef),

I got a job and was saving the earnings I was getting from there. But from a lot of books I've read, I've realized saving in banks

is most times useless because inflation will reduce the value, unless you're saving to invest.
Seeing that the money saved won't be needed for anything for a while,

I started looking for ways to MAKE MONEY WORK FOR ME rather than the other way round. While on this quest,I made

a promise to myself to look the other way when I see any opportunity that looks like a ponzi or investments with unrealistic ROI and turn over days without working hard or smart.

Don't forget the put 1k by 1pm and get 50k by 5pm.
I rather spend my money frivolously than invest

invest in any of those, so I kept on saving until I came across a tweet by a guy saying rather than use 5million to travel out he rather invest with @addyfx_au .

so I checked them out did some research and invested some of the savings with them (it has been blissful ever since

You can check them out if you want.).
A wise person doesn't put all his eggs in one basket, I wanted to diversify so I kept on searching.

One night I was scrolling through tweets and a tweet by @aproko_doctor caught my attention saying "WHAT INVESTMENT OPPORTUNITIES ARE YOU IN

IN SOMEONE MIGHT BE INTERESTED". I scrolled through all the comments I knew I'll get good suggestions there.

I picked @bruno_nwogutweets out of all it sounded more realistic, what 40k can turn to with a marketing skill that teaches you the basics of a whole bunch of skills,such as graphics designing web designing affiliate marketing,Facebook &IG ads,email marketing

And automations Not just will it teach you the basics of these https://t.co/FVjWJHP5xZ will also learn how to use these skills to make money online.I entered his wall scroll through and saw a link to a video explaining more about that tweet, the video duration lasts an hour but

I wanted to know more and I can say completing that video is the best thing that has happened to me this year.its like enrolling for a course teaching you and still giving you expo during exams, Holding your hands

and leading you to where money is and telling you to pack as much as you want, therefore Changing my financial life bit by bit

if you’re like me not necessarily a student but in search of a second means of income or side hustle you can also watch the first video I watched by Clicking

Here https://t.co/0JVZjWUXqp

ASUU literally gave me a year off lectures I’d have lost if I wasn’t making money instead

P.s I discussed with a lecturer last week, seems like ASUU is really in it for us(students). So make we just dey house dey make money.■
