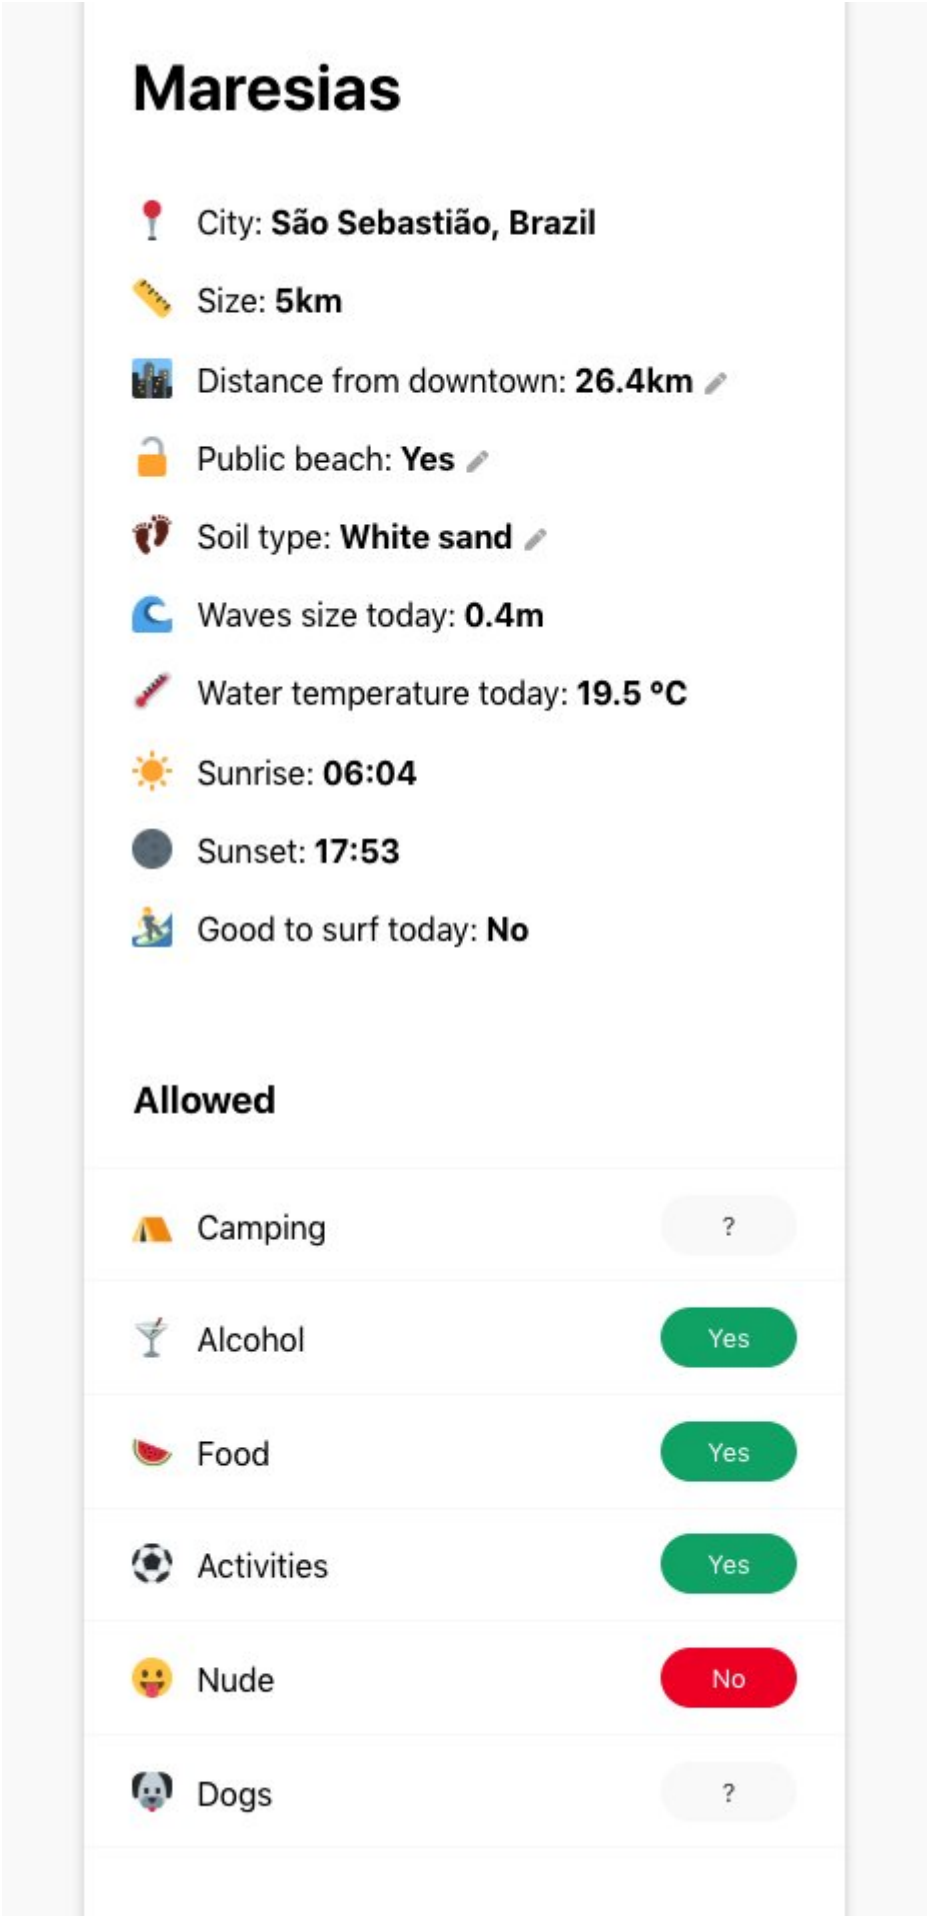
# Twitter Thread by Guilherme Rizzo

**Guilherme Rizzo**
@gvrizzo

**■ I'm building a crowdsourcing website to catalog data from all the beaches in the world!**

**Such as if the beach is dog-friendly, have free wifi or 3g coverage, what are the main activities there, and many more... ■■■■■■**

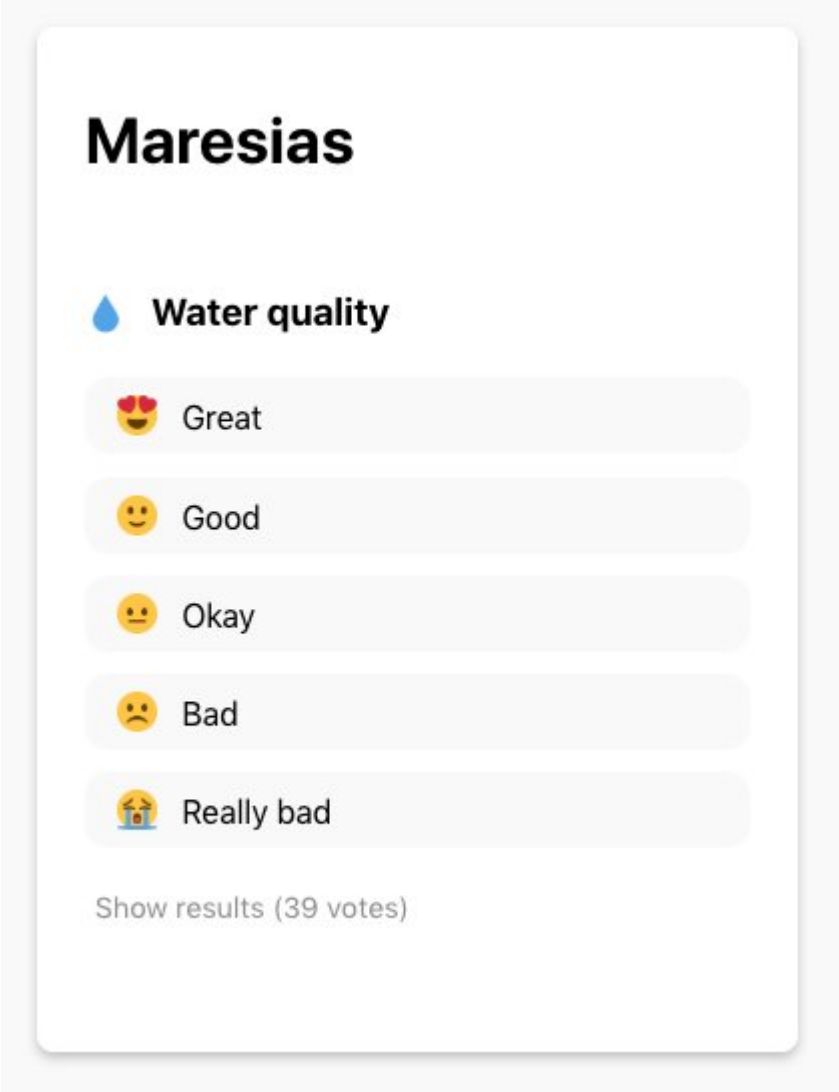
**Let's build this in public (thread) ■**



■ After some code optimizations today, the Poll component is ready!!

■ How it works: It's flexible and accepts different types of Polls, e.g.: Yes/No or Ratings (from Great to Really bad), etc...

■■■■ Users will be able to vote and the most voted option will be chosen.

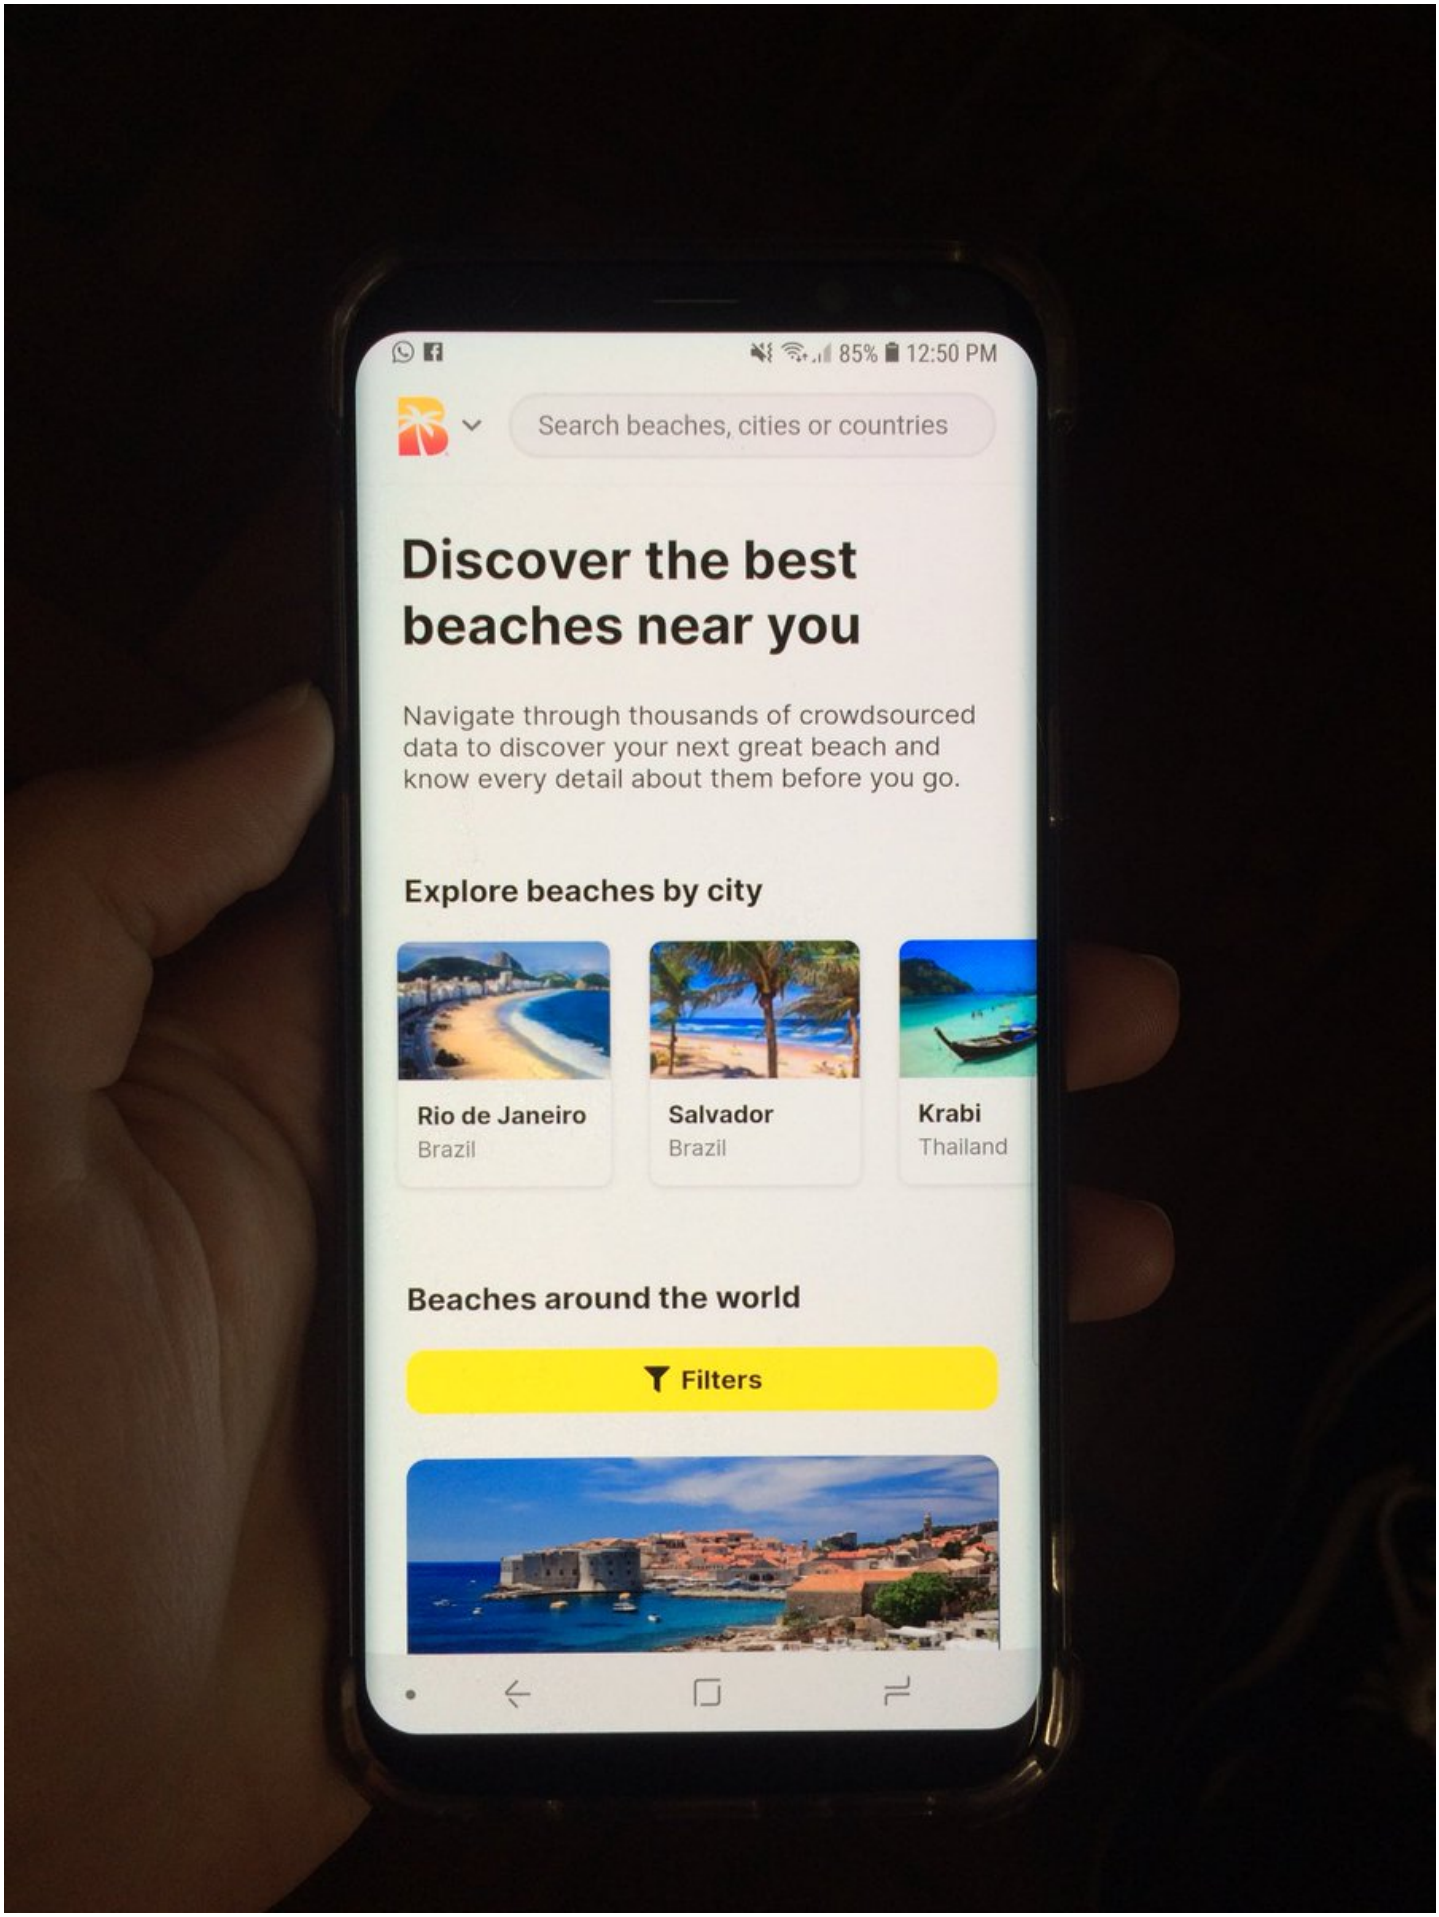


■ Just had an amazing conversation with @rylandking we're partnering for a better world for beach lovers!

■ You'll be able to find in-depth information for surf such as best spots, surf schools, and many more via SurfTripList!

SurfTripList+BeachGuide ■■■■■■■

■ This is how BeachGuide is looking now on mobile, almost launching! Just need to finish the API and implement front end connections to it



Ps: logo its not mine and it will not be the official, only testing
