.@N12News assessment of Lt. Gen. Aviv Kochavi's tenure as IDF Chief of Staff at 2 yrs:

2-@n12news:IDF finishing 2 good yrs since Kochavi's appointment: few Israelis harmed by terror, terror attacks stopped at border, including sea and land penetrations from Gaza , bombs on Syrian border, rocket attacks, Cyber attacks

3-@n12news: On the offensive, IDF engaged in, intensifying "war between wars" -- most activity carried out by air or sea, small part through cross-border special forces ops. Not just in Syria, but also Iraq, Lebanon, Sinai, in addition to reported cyber attacks in Iran

4-@N12News: Significantly damaged weapons, bases, armament factories. "Iranians evacuated 50% of forces in Syria, moved bases east," mistakenly thinking this would complicate IAF missions. Damage also to Syrian Army, its missile factors and defense systems

5-@n12news: War Between Wars will expand in coming yr, but this brings Israel closer to point where opponents can no longer restrain themselves

6-@N12News: The coming yr will be "Yr of Iran" - after this had been shelved for some time. IDF once again prioritizing action, and Kochavi has instructed IDF to accelerate developing capabilities and attack readiness.

7-@N12News: Kochavi's personal relationship w/Gen. Milley important for joint activity, intel sharing, and joint operations

8-@N12News: However, Kochavi believes the most explosive arena is Gaza, with IDF preparing target banks, etc. accordingly
