# Twitter Thread by Research Engineering at the Turing

Research Engineering at the Turing
@turinghut23

■■ BIG NEWS: We are hiring!! ■■

Amazing Research Software Engineer / Research Data Scientist positions within the @turinghut23 group at the @turinginst, at Standard (permanent) and Junior levels ■

■ Here below a thread on who we are and what we

We are a highly diverse and interdisciplinary group of around 30 research software engineers and data scientists ■■ ■ https://t.co/KcSVMb89yx #RSEng

We value expertise across many domains - members of our group have backgrounds in psychology, mathematics, digital humanities, biology, astrophysics and many other areas ■■■■■■■■■■
https://t.co/zjoQDGxKHq
/ @DavidBeavan @LivingwMachines

In our everyday job we turn cutting edge research into professionally usable software tools. Check out @evelgab's #LambdaDays ■■■ presentation for some examples: https://t.co/GzO9m1CGz4

We create software packages to analyse data in a readable, reliable and reproducible fashion and contribute to the #opensource community, as @drsarahlgibson highlights in her contributions to @mybinderteam and @turingway: https://t.co/pRqXtFpYXq #ResearchSoftwareHour

To know more, here's a day in the life of a Research Data Scientist in our group, @louise_a_bowler ! ■■■■
https://t.co/1KPERqj7If

> Hi everyone! I'm Louise Bowler, a Research Data Scientist from @turinginst's Research Engineering Group @turinghut23. I'm borrowing the account for the day to show you all a day in the life of a Research Data Scientist! \U0001f469\u200d\U0001f4bb

We are expert collaborators and work with the @turinginst community and beyond to enhance the applicability of their research. Check out the spotlights of some of our members ■:
https://t.co/KknkBtl6bg / @CamilaRangelS @radka_jersak @louise_a_bowler

We often host and work together with members of the civil service @faststreamuk program - see @Kevinzhangxu's thread about his experience with us earlier this year ■: https://t.co/0UeLNhIJ9L

Today this account is being taken over by Kevin Xu, from the civil service fast stream program that is doing a placement in our team for the next 6 months. He will be talking about the projects he is working on and how is to join a new team fully remote. pic.twitter.com/3ULLODPuDV

— Research Engineering at the Turing (@turinghut23) July 1, 2020

We highly value the development and career progression of our members: we have a dedicated Junior training role, and through our internal promotion scheme people have been promoted to Senior, Principal and even to Director! If you'd like to know more, contact @martinoreilly!

Some of our projects are covered in the Turing Podcast ■■, started by @EChalstrey, a (former Junior!) Research Data Scientist from the team: https://t.co/kmpPE1UldD

We work on topics ranging from data security ■ to air traffic control ✈■, from modelling contact-tracing during the current pandemic ■ to the industrial revolution ■ (@LivingwMachines): to find out more, see our website! ■
https://t.co/PaYng3c5Qa

Or check out our brand new @TuringDStories project!! ■■https://t.co/PEWnUMxoXc / @DavidBeavan @CamilaRangelS @Kevinzhangxu

Today it\u2019s \U0001f389 graduation time \U0001f389 for @openlifesci. @CamilaRangelS Sam Van Stroud @Kevinzhangxu and myself have worked so hard to get here with @TuringDStories \U0001f4ac\U0001f4ca\U0001f4c8\U0001f9e0. If you want to learn how to maximise your open research, then apply for the next cohort https://t.co/t7GUZxP9Fl

— David Beavan (@DavidBeavan) December 15, 2020

And now, about you...

If you understand the importance of good practices for producing reliable software and reproducible analyses (as described for instance by @turingway), are fluent in a programming language used in #DataScience, and love to learn new skills, we strongly encourage you to apply!

In addition, if you feel that your profile would support the Group's activities, we would love to hear from you! Look at our historian turned into data scientist ■■■: https://t.co/WJyc77kt49 / @f_nanni @LivingwMachines

Or at the contributions of our seismologist @kasra_hosseini to research in #digitalhumanities
https://t.co/0jPjUXvtOu

Experience in teaching and training, building #opensource communities, scientific computing and other themes are also very welcome - surprise us!

In particular, if you have worked (or would love to work!) on cloud ■■ or high performance computing get in touch! Tomas is available if you'd like to know more ■:
https://t.co/dgkK45JzN6 #HPC

We welcome any informal inquiries and will set up drop-in sessions if you'd like to have a chat with members of the group before applying. Just send a message to @f_nanni or @CamilaRangelS, or subscribe here:
■ https://t.co/3e4b0dsEDJ

Again, consider applying or pass it on to colleagues and friends who might be interested!!
■ https://t.co/LnGW7JNQX5
