## ■ Beginner's Roadmap for Front-End

$$\begin{array}{c} \mathsf{HTML} \; \& \; \mathsf{CSS} \to \blacksquare \blacksquare \blacksquare \to \mathsf{JavaScript} \to \blacksquare \blacksquare \blacksquare \\ \downarrow \\ \blacksquare \blacksquare \blacksquare \leftarrow \mathsf{React}^* \leftarrow \blacksquare \blacksquare \blacksquare \leftarrow \mathsf{Tailwind}^* \\ \downarrow \\ \mathsf{TypeScript} \to \blacksquare \blacksquare \blacksquare \to \mathsf{Next.js}^* \to \blacksquare \blacksquare \blacksquare \to \blacksquare \end{array}$$

What would we cover?

- HTML & CSS
- JavaScript
- **3** CSS Frameworks
- O UI Frameworks
- TypeScript
- Server-side Frameworks
- Practice, Practice and, Practice
- Other Skills
- 9 Frequently Asked Questions
- O HTML & CSS
- Your Front-End journey shall always start from HTML & CSS and, ends with these as well.
- Don't over burden yourself to learn everything at once. It's a continuous subject.
- Do not separate HTML from CSS. That's unnecessary.

2 JavaScript
JavaScript is essential. You should start with basics and move to complex subjects.
<ul> <li>JavaScript Syntaxes</li> <li>(preferably ES6 onwards)</li> <li>HTML DOM API</li> <li>Event Handling</li> <li>Fetch API</li> </ul>

<b>❸</b> CSS Frameworks
CSS Framework is necessary if you are planning to be a professional developer.
CSS Framework is necessary if you are planning to be a professional developer.  There are so many options available.
There are so many options available.
There are so many options available.  O Tailwind CSS
There are so many options available.  O Tailwind CSS O Bootstrap
There are so many options available.  O Tailwind CSS O Bootstrap O Chakra O Bulma O Foundation
There are so many options available.  O Tailwind CSS O Bootstrap O Chakra O Bulma O Foundation O Skeleton
There are so many options available.  O Tailwind CSS O Bootstrap O Chakra O Bulma O Foundation
There are so many options available.  O Tailwind CSS O Bootstrap O Chakra O Bulma O Foundation O Skeleton
There are so many options available.  O Tailwind CSS O Bootstrap O Chakra O Bulma O Foundation O Skeleton O Pure CSS
There are so many options available.  O Tailwind CSS O Bootstrap O Chakra O Bulma O Foundation O Skeleton O Pure CSS  Start with anything. You can switch any time.
There are so many options available.  O Tailwind CSS O Bootstrap O Chakra O Bulma O Foundation O Skeleton O Pure CSS  Start with anything. You can switch any time.
There are so many options available.  Tailwind CSS Bootstrap Chakra Bulma Foundation Skeleton Pure CSS  Start with anything. You can switch any time.  UI Frameworks  To build a complex application, you will start using a UI framework sooner or, later.

O Angular
O Svelte
Go through their documentations. Choose according to your requirement, future interest.
<b>⑤</b> TypeScript
□ JavaScript initially looks to be enough. But once projects become complex and bigger, you will notice how tough it's getting to handle.
☐ The biggest drawback (biggest advantage as well) of JavaScript is its dynamic typing. TypeScript is for your rescue.
Client-side UIs (or, Single Page Applications) are
O Slow at startup
O Not fully SEO friendly
O Difficult to grow
Adapt to Server-Side frameworks.
O Next.js
○ Gatsby
O NuxtJS
Practice, Practice and, Practice
□ Don't just read books and, articles or, watch videos. To learn effectively, you have to practice.
☐ Practicing after each step is very very important.
I am here sharing few practice sets.

Other Skills
These are some mandatory skills
① Git Knowledge of Git is must. You can use clients like GitHub, GitLab etc.
② Data Structures You should learn basic data structures like Array, Linked List, Stack, Queue, Tree, Graph etc.
Below are some "nice-to-have" skills
③ CSS Preprocessors
CSS is powerful but, sometimes we may need features which are not available in CSS. There, CSS Preprocessors help a lot.
We can choose from
O Sass O LESS O Stylus O PostCSS
Web APIs
Apart from DOM API and Fetch API, you may have to use many other APIs for building a great web application.
https://t.co/ISM6631s7N

11 Web APIs for Advanced Web Development

— Swapna Kumar Panda \uea00 (@swapnakpanda) <u>April 1, 2022</u>
⑤ State Management Libraries
Managing data (state) in a UI application becomes a tough task when they become abundant.
You may consider to use
O Redux
O Mobx
O React Query
O xstate
© GraphQL
Traditional data fetching from server is a repetitive and slower operation.
GraphQL is a nice invention. It's grooming. Consider using any of the below GraphQL clients.
O Apollo Client
O Relay
O GraphQL Request
O AWS Amplify
O urql
Frequently Asked Questions
① Can I learn JavaScript before HTML & CSS?
Yes. You can learn basic syntax.
For DOM API and Event Handling etc., you would need knowledge of HTML & CSS.
② Can I learn TypeScript before React & Tailwind?
Yes. This is for illustration only. You can always prepare these 3 in any order.
③ Why Tailwind, but no Bootstrap?
It's just for illustration. You can choose any CSS Framework of your choice.
Why no Angular?
It's just for illustration. You can choose any JS Framework of your choice.
⑤ Why are only JS frameworks mentioned?
I have prepared this roadmap keeping JS frameworks in mind. You can chose any framework.
© There are no CSS Preprocessors?

CSS Preprocessors are helpful, no doubt. But, in most circumstances, you may not need them. Use them as per the need.

⑦ Does ■ mean, it's finished?

No. The Web Development is evolving every day. So, don't stop.
