Never let a loss exceed 8% changed his trading game for the better.

<https://t.co/liy05R0NT6>

The big turning point in my trading came when I made a decision and vowed to NEVER EVER let a loss exceed 8%. During the next 5 years I averaged 220% per year for a total compounded return of 33,500%. It's been 28 years since and I have never broken that discipline not even once!

Key early decisions to make for your trading career.

<https://t.co/G0EIHkGONN>

A few key decisions early in my trading career and my financial life completely changed for the better in just a few years.

1. No big losses

2. No averaging down
3. No chasing extended stocks
4. No giving back decent profits
5. Always get odds on my money

— Mark Minervini (@markminervini) June 13, 2021

Never listen to naysayers.

<https://t.co/xpCSSihb1g>

Only losers discourage dreamers. Only those who never achieved big things discourage those attempting to achieve big things. Only those who think small discourage those who think big. Never believe discourages. They have no credibility! Believe winners. Believe in YOU! \U0001f447 [pic.twitter.com/JdAhRy3IRJ](https://pic.twitter.com/JdAhRy3IRJ)

His top trading rules!

<https://t.co/VrEvxvaUk2>

My top trading rules...

1. Cut all losses short.
2. Never average down on a loss.
3. Only get aggressive when my trades are working.
4. Never let a good size gain turn into a loss.
5. Always get odds on your money.

The grand majority of your problems trading will stem from breaking the following rules...

Learn optimal math!

<https://t.co/HnIRMQbCv6>

You gain 100% and lose 50% 10 times, you break even. You gain 10% and lose 5% 10 times, you make 71.64%. The key to big returns is optimal math, not the biggest wins. <pic.twitter.com/FShPKSI5d2>

Important advice from him.

<https://t.co/QWyWyWaqXY>

Some important advice and keys to my success:

1. Don't force trades - wait for proper stocks setups. How long? As long as it takes!
2. Only buy in the direction of the trade.
3. Only get aggressive when trades are working well; scale back when their not.
5. Never add to losers.

Keys to his success.

4 keys to my success:

1. I wait for easy dollars while the amateurs fight for hard pennies.
2. I get aggressive when amateurs doubt the setups.
3. I take profits when amateurs get greedy and hysterical.

4. I religiously manage my risk while amateurs hold losers. [pic.twitter.com/ArLX8pfvZH](https://pic.twitter.com/ArLX8pfvZH)

Be committed & be patient.

<https://t.co/sesyO8IFsC>

Stock trading is a business, not a get rich quick scheme. Most get into trading thinking it's easier than it is. Becoming a highly successful trader requires a real commitment to learning just as if you were going to school to become a doctor or lawyer. Be patient with yourself.

Don't routinely allow profits to turn into losses.

<https://t.co/YuN2JKI8Ps>

I grew up poor; I value a dollar. Once I get a decent profit, I don't give it back. That's one of my success "secrets." Never let a good size gain turn into a loss. I've never met a highly success trader that routinely allows gains to turn into losses.

Learn to lose less.

<https://t.co/w5O7g0EvQb>

Let's assume you make 200% on your money over 4 years during a bull market (a respectable 32% per per year). In year 5 you fail to avoid a bear market decline and you give back 50%. Your 5-year return is now just a little over 8% per year. Not even worth taking stock risk. [pic.twitter.com/XaYx31xeYG](https://pic.twitter.com/XaYx31xeYG)

No way around risk management.

<https://t.co/BGCK6dejDA>

I dedicated 37 years to learning and perfecting the craft of stock trading. If there was a way around risk management, I probably would have found it. PhDs, Nobel prize winners and geniuses haven't been able to do it. Your losses must be managed smaller than your gains.. period.

Don't give up on your trading strategies.

<https://t.co/0Pvg5cnAuh>

I love when breakouts don't work for a while and the crowd starts saying buying breakouts is a strategy of the past and they give up on it. It eliminates the noise and then it works like a charm. Been doing the same thing successfully for more than 3 decades. How? Discipline! [pic.twitter.com/9WwloOzEM](https://pic.twitter.com/9WwloOzEM)

Perfect practice makes practice.

<https://t.co/X9rPGAUwSe>

One of the big misconceptions in sports, business, trading and in life... is that practice makes perfect. Wrong! Practice makes habit. If you are practicing incorrectly... practice will just engrain bad habits. Only perfect practice makes perfect.
