**Covering one of the most unique set ups: Extended moves & Reversal plays**

**Time for a ■ to learn the above from [@iManasArora](#)**

What qualifies for an extended move?

30-40% move in just 5-6 days is one example of extended move

How Manas used this info to book profits

<https://t.co/0kXazcQALq>

The stock exploded & went up as much as 63% from my price.

Closed my position entirely today! [#BroTip](#) <pic.twitter.com/CRbQh3kvMM>

Post that the plight of the stock:

<https://t.co/RacbhJa8LY>

What an extended (away from averages) move looks like!!

If you don't learn to sell into strength, be ready to give away the majority of your gains. [#GLENMARK](#)

Example 2: Booking profits when the stock is extended from 10WMA

10WMA = 50DMA

<https://t.co/ecETkv9cGV>

#HIKAL

Closed remaining at 560

Reason: It is 40+% from 10wma. Super extended

Total revenue:  $11R * 0.25$  (size) = 2.75% on portfolio

Another hack to identify extended move in a stock:

Too many green days!

Read below

<https://t.co/RIs20fFu0u>

When you see 15 green weeks in a row, that's the end of the move. \*Extended\*

Simple price action analysis. [#Seamecltd](#) <https://t.co/gR9xzgeb9K>

When you buy a stock, first check whether they are extended from the MA, if yes then the probability of those stocks performing is lower

Read this entire thread, to know the rules of extended

<https://t.co/532mOFvRwZ>

Quick question.

Would you trade this VCP pattern in the making? Yes/No? And, why? [pic.twitter.com/EEfjK9fQH9](https://pic.twitter.com/EEfjK9fQH9)

— Manas Arora (@iManasArora) [September 5, 2019](#)

Check you trade journal now, and go through the trades that didn't work, now check whether those were extended?

<https://t.co/0oKyHpCvUD>

Chk your past trades & the entry point. Out of all the trades, how many trades were already extended when you entered?

In my entire trading experience, I have seen the majority making this mistake. Let me knw how much you could have saved. I bet the number will be HUGE!#BroTip

Positional/Swing traders are always have one question, when to book profits?

Ans: Exit partial qty when the stock gets extended

Simple yet Effective!

How extended move on the upside can be used to Short a stock:

Example 1: Shorting #JSWSTEEL on the basis of Extended move

<https://t.co/k5aiwJCJG1>

Trade reason - #JSWSTEEL Short (Didn't post)

Extended move (Main basis of the trade)

+

After an already stretched move, it broke out at 1 without spending enough time/rest

+

Sold at 2 (For a better R/R)

+

Failed breakout at 3 (Confirmed my view)

+

Covered at 4#Simple [pic.twitter.com/uUsy8sBgbB](https://pic.twitter.com/uUsy8sBgbB)

— Manas Arora (@iManasArora) [May 25, 2021](#)

Example 2: Shorting #ADANIENT on the basis of Extended move

<https://t.co/dnZUtTVNsN>

Trade reason - #ADANIENT Short

Extended move (Main reason)

+

Lethargic post-breakout reaction at 1

+

Failed breakout at 2

+

Failure to cross the breakout point at 3

Strike at 4!#PriceAction

And this is how [@iManasArora](#) shorts Index #NIFTY basis extended move

<https://t.co/NoEGLHsrQp>

#NewPosition - Short in #Nifty August Future at 11275

— Manas Arora (@iManasArora) [July 29, 2020](#)

Not many traders short, especially the newbies, so here is an imp note:

Disclaimer: These stunts are performed by a pro [@iManasArora](#) , pls dnt jump directly into shorting without knowing the basics

So far you have understood two things:

1. Never enter an extended stock
2. Use the extended info to book profits or go short

But then, long only traders in cash segment think they cant utilize the opportunity in a down trending market

**Manas Arora** @iManasArora · Nov 24, 2021

If you only know buying triangle, cup & handle, rectangle breakouts etc., then you will be out of business for a very long time when the market falls hard.

Include buying falling knives/bottom bounce/excessive weakness. This is what you see in plenty after the crash.

#BroTip

Time to bust this myth, @iManasArora shows how one can use the extended info to go long - REVERSAL PLAY!

Look for stocks down 4-6days in a row. Then look for reversal signs on a much lower frame to enter.

Manas believes: Excessive weakness offers a good long opportunity!

Thinking out of the box!

Lets see how @iManasArora Walks the Talk

**Manas Arora** @iManasArora · Apr 12, 2021

We look for relative strength. Stocks that don't go down with the market. But stocks down 'a lot' also gives a big **reversal** move. That's where I will look for money this week. Watch out.

Be creative and have an open mind!

<https://t.co/NgcRMZtiOP>

They say stocks that hold strong on a very bearish day should be bought. This was my reversal watchlist for today. These names got severely beaten down yesterday. The result is out. Which stock is 6%+ up that held strong yesterday?

A lot of people have a question, what if it falls further?

Ans: You can always get out with a small SL, but but but, remember the opportunity is only gonna get more sweeter

Since, @iManasArora enters a trade with tight stops of 1-2%, he has studied the behavior of his trades in past, and from experience he knows how much time they take to perform or fail!

You can use this info to build a system of yours!

Applying extended move logic not just to stocks but extending it your P/L

**Spoiler Alert: When making money becomes this easy, slow down.**

**#BroTip**

Now when the stocks have an extended move on the downside, instead of being grumpy, be happy that the opportunity to play the Reversals is round the corner
