■ I'm building a crowdsourcing website to catalog data from all the beaches in the world!

Such as if the beach is dog-friendly, have free wifi or 3g coverage, what are the main activities there, and many more... ■■■■■■

Let's build this in public (thread) ■

Maresias

📍 City: **São Sebastião, Brazil**

📏 Size: **5km**

🏙️ Distance from downtown: **26.4km** ✏️

🔓 Public beach: **Yes** ✏️

👣 Soil type: **White sand** ✏️

🌊 Waves size today: **0.4m**

🌡️ Water temperature today: **19.5 °C**

☀️ Sunrise: **06:04**

🌑 Sunset: **17:53**

🏄 Good to surf today: **No**

Allowed

⛺ Camping		?
🍸 Alcohol		Yes
🍉 Food		Yes
⚽ Activities		Yes
😛 Nude		No
🐶 Dogs		?

■ After some code optimizations today, the Poll component is ready!!

■ How it works: It's flexible and accepts different types of Polls, e.g.: Yes/No or Ratings (from Great to Really bad), etc...

■■■■ Users will be able to vote and the most voted option will be chosen.

Maresias

💧 **Water quality**

😍 Great

🙂 Good

😐 Okay

🙁 Bad

😭 Really bad

Show results (39 votes)

■ Just had an amazing conversation with @rylandking we're partnering for a better world for beach lovers!

■ You'll be able to find in-depth information for surf such as best spots, surf schools, and many more via SurfTripList!

SurfTripList+BeachGuide ■■■■■■■

■ This is how BeachGuide is looking now on mobile, almost launching! Just need to finish the API and implement front end connections to it

Ps: logo its not mine and it will not be the official, only testing
