**MCap is a function of market sentiments. Balance sheet, cash flows, R&D execution, talent acquisition, regulatory compliance, M&As and so on....are a function of management/governance. Never mix the business with the stock. Stock is not the business. Business is not the stock :)**

It's simple, if "FY23 PAT of this API to CDMO = FY21 PAT of largest pure-play CDMO/API" then the FY23 Mcap of this API/CDMO= FY21 Mcap of largest pure-play CDMO/API, am I correct Sajal saab??
