Last week when Adani enterprise was going up, I have observed people were hesitant to buy Adani enterprise but were buying easy alternate in Adani port, even though it’s under performing Adani Ent. Comparative charts and gains are in front of you. (1/2)

Here comes the psychological problem traders face, even though they know that enterprise is better and obvious choice. Still they keep buying port in anticipation instead of buying what's actually moving right now. Trade in NOW, FUTURE will be yours ! (2/2)
