English Translation of Shri.Vimal Jain's tweet:
For several years we have been consuming imported pulses. 2 years back Modi ji started stopping it and now it has been completely stopped. this protest against farmers laws is just a Sham. the real reason and story are here.
1/n

Let us read. In 2005 Manmohan stopped the subsidies for pulses. after 2 years Netherland, Australia and Canada entered into understanding with the government which was importing the pulses. several big pulses farms came up in Canada. they were handed over to the Punjabi sikhs
2/n

who were residing there and so India started importing Canadian pulses in a big way. big importers like Amarinder, Kamal nath and such congressmen along with akalis like Badal were there. they started selling the pulses the rate of 200 to 250 per kilo and soon they were
3/n

transacting in crores. Indians were facing severe price rises. when Modi stopped the imports these people started playing. their Canadian farms were falling into disuse. that resulted in loss of jobs for khalistanis. moreover there is a threat that any sikhs will be sent
4/n

back to Punjab. anyway khalistani s are Congress men's gift.
The farm laws are opposed by foreign forces and khalisthani sikhs more than anyone else. their income is hit and moreover if the Indian farmer becomes independent and well to do they will be affected. now Modi ji has5/n

sworn to improve India and people are supporting him. soon Indian economy will be the best in the world. Because it is moving to a stage where it doesn't need to import any footstufs.
2. Adani and Ambani, whatever trade they have taken interest in, have removed the Monopoly
6/n

and have been giving the people commodities at reasonable prices, at the same time making a good profit. Indian consumers are benefited. just think of how much of money has been looted before. now all the concerns are forced to bring

down their prices. because Adani Agro is
7/n

growing the opposition is shouting why Adani is creating godowns. Pepsico, Wal-Mart, Hindustan Unilever and ITC and such foreign concerns created godowns in Punjab, Haryana and Maharashtra in a big way and there was no opposition. but when Adani does the same why is there so
8/n

much of opposition?
Reliance retail and Reliance digital have spread all over the country. therefore Amazon and Flipkart are naturally affected. because the emergence of Swadeshi Patanjali Hindustan lever which was making Colgate Lux points and such stuffs lost their
9/n

monopoly. in India and all over world Chinese are interested in selling 5G technology but jio is all set to install that technology throughout India and this is irritating China's huwei. Adani ports and Adani enterprises are stopping all the monopolies and is growing fast.
10/n

now our own Indian traders and industries are improving and doing good to the country. why is that these people are opposed by our own Indians? Adani, Ambani are Patanjali or not forcing you to buy their products nor are they taking something away from you. so understand
11/n

the game now.
Now Punjab Punjabi farmers, leaders are against Adani. they are crying “why Adani is creating godowns? they will catch our lands … the prices we skyrocket” and such inane statements. but Indian and foreign companies have created godowns in Punjab for last
12/n

several years and even now it is continuing. they are saying that if Adani comes now stuffs will be scarce, prices will rocket. they are interested in spreading rumours like that. but the truth is that every year million tons of grains, vegetables and fruits are getting
13/n

spoilt and this are bought at throw away prices and supplied to liquor industries. now this can be saved properly in godowns. the problem for Punjabies is that prices will be more or less study and the commission agents will use lot of money.
14/15

For people who have seen income in crores when the income stops suddenly naturally they are affected.
please spread this message to everyone
yours truly
Vimal Jain.
