Now that it is clear that the people protesting the #FarmBills have been misused like pawns by organisations such as 'Poetic Justice Foundation,' which are open supporters of Khalistan, we should step back and understand the true ramifications of this situation.

When do organisations such as PJF become active?
When they sense weakness in a country which is on their radar. India is an agrarian country. Agriculture has always been a sensitive issue, close to the heart of every Indian. #IndiaAgainstPropaganda #IndiaTogether #India

This goes without saying that when our farmers, misinformed or otherwise, protest like this, it hurts our sentiments as a nation. #IndiaAgainstPropaganda #IndiaStandsTogether #IndiaTogether #India

@narendramodi ji, @nstomar ji , the entire council of ministers, agricultural experts, economists and internationally reputed agricultural agencies have lauded the bills and have proactively tried to dispel myths about them. #IndiaAgainstPropaganda #India

The government has discussed the bills with the farmers with an open mind and heart. They have been invited to discuss the merits of each and every point in the bills. #IndiaAgainstPropaganda #IndiaStandsTogether #IndiaTogether #India

The government has gone the extra mile to offer holding the implementation of the bills by 18 months to put the farmers and adhatiyas at ease about the transition. But they have outrightly rejected all efforts of outreach, and have not even paid heed to the Supreme Court.

It is clear that the protestors don't represent each and every farmer in the country. Even then, there was hope that matters could be resolved through dialogue, as it happens in a democracy. #IndiaAgainstPropaganda #IndiaStandsTogether #IndiaTogether #India

However, now the enemy within and outside can be seen circling the protest sites like vultures, greedy for their piece of flesh.
Sources have informed that organisations like PJF have received a breath of life in pursuance of their unholy objectives due to these protests.

They are on a shopping spree for international celebs, who may not have an iota of knowledge about farmer issues, but are flexible with their principles. Once in a while, “Khalistan” is mentioned in the same breath as “farmer rights.” #IndiaAgainstPropaganda #IndiaTogether #India

Now, a video has surfaced in which the proud office bearers of PJF have claimed that the demand for Khalistan will be pursued even if the three bills are repealed. That clarifies a lot. I ask – What Khalistan? Before partition, a major portion of Punjab was in today’s Pakistan.

Canada and other countries have huge numbers of Sikhs. So what will be the borders of Khalistan? Maybe they can seek guidance from the country in which this terror movement was hatched in the first place.Partition on the basis of religion, and its bitter fruits are for all to see

Go to Punjab and ask the people who lost their dear ones to the Khalistan movement. The Punjabis hate terrorism much more than the average Indian who hasn’t lost as much to its evils. The Sikh community is one of the most revered ones in India. #IndiaAgainstPropaganda #India

The Sikhs who fought the Mughals for their faith and compatriots, who sacrificed their children, and established an order on the principles of service to humanity and compassion, will they ever support such an unholy demand?Admit it or not, the agitation has started being misused

This is shameful, and will always be. The Guru Sahibaan doesn’t teach us this!
The country in which the aforementioned person was spewing venom, had lost so many of its loved ones in 1985, when Khalistani terrorists blew up an Air India flight. They don’t understand.

Acid corrodes its own container the most, more than anything. These very people were responsible for terrorism in Punjab, which lead to the devastation of so many families there.
I would like to send a message to the Leaders of the protesting farmers. #IndiaAgainstPropaganda

Maybe PJF seems convenient to you now. But in the not so distant future, you will come to be identified as the people who let our enemies infiltrate our great democracy. For what? A few tweets and words of support from celebrities whose words are for sale to the highest bidder?

Meanwhile, this is titillating to the people who are obsessed with seeing India fall. They are working in their own interests. Their loyalty is with whatever makes India weak, and not with farmers.
#IndiaAgainstPropaganda #IndiaStandsTogether #IndiaTogether #India

However, the forces who are underestimating the power of India’s democracy must know. First understand democracy, and then India. The tea and yoga which you are trying to defame, has won over people globally not because it was pushed down their throats. #IndiaAgainstPropaganda

No amount of conspiracy or wealth can make people forget what India truly stands for. The love and respect has been earned and not bought. There are termites inside our nation who rejoice whenever our country is embarrassed. They will be defeated. People know them.

India is one, and will remain so forever.

I call upon everyone to come together and show these evil forces the true power of Indian democracy by defeating them.

Jai Hind!
