@Daoyu15 @lab_leak @walkaboutrick @ydeigin @Ayjchan @franciscodeasis @TheSeeker268 @angie_rasmussen Clearly, because as I have been saying for 8 months now, DTRA and DARPA have been using Ecohealth and UC Davis to collect novel pathogens for gain of function work back in the USA. I have documented this in many threads which I will post here just to annoy everyone.

28. Before moving on to DARPA, let's look at DTRA:

A must read!

It is astonishing the number of pies they had their dirty little fingers poking into:

Note John Epstein and Kevin Olival from EcoHealth Alliance are key figures in DTRA: <https://t.co/O4QwVWrm7m>

That is the key question

1. DARPA/DTRA use NGOs like Ecohealth or Metabiota to collect new pathogens

2. They are sent to US labs (Mailman, Rocky Mountain, Atlanta CDC, UNC, USAMRIID) for GOF work by Lipkin, Nichols, Rasmussen, Baric, Densin, Munster, etc <https://t.co/wqhHK7uZO6>

17. DTRA spent vast amounts of US Taxpayer's \$\$\$ on predicting & preventing the "next pandemic" since 2010:
