@Duiker101

Did you know that in devtools you can select an element and press `h` to apply `visibility:hidden` ?

This will make the element invisible without disrupting the layout.

Pretty handy to debug some issues with stacked elements!

Do you know other similar shortcuts?

The screenshot shows a Twitter profile for Simone - HackerTyper (@Duiker101). The profile banner features a drawing of a person's head and the text "#BLACKLIVESMATTER" next to a raised fist icon. The profile picture is a circular photo of a smiling man. Below the profile picture, the name "Simone - HackerTyper" is followed by a verified badge and the handle "@Duiker101". The bio reads: "Creator of [HackerTyper.net](#) • Perpetual learner • Web Dev @Vizzlo • Jack of all trades • Digital nomad • he/him". Location is "Cyprus" and website is "duiker101.net". Joined February 2011.

Below the profile, the browser's DevTools are open. The "Elements" panel shows the DOM tree with the following structure:

```
<div class="css-1dbjc4n r-ku1wi2 r-1j3t67a r-m611by">
  <div class="css-1dbjc4n r-obd0qt r-18u37iz r-1w6e6rj r-1wtj0ep">
    <a href="/Duiker101/photo" role="link" data-focusable="true" class="css-4rbku5 css-18t94o4 css-1dbjc4n r-yfoy6g r-f6ebdl r-sdzlij r-1phboty r-14f9gny r-1loqt21 r-1gzrgec r-cnkkqs r-zjg7tu r-mtrfb5 r-1ny4l3l r-ludh08x r-o7ynqc r-6416eg r-1xce0ei"> == $0
    <div class="css-1dbjc4n r-1adg3ll r-1udh08x" style="display: none;">
      <div class="css-1dbjc4n r-1twgtwe r-sdzlij r-rs99b7 r-1p0dtai r-1mi75qu r-1d2f490 r-1w6e6rj r-1wtj0ep">
```

The "Styles" panel on the right shows the computed style for the selected element:

```
element.style {
  visibility: hidden;
}
.r-cnkkqs {
  margin-left: -4px;
}
.r-1gzrgec {
  margin-bottom: -4px;
}
```
