#DRASTIC in the News Compilation Thread (2021)

1. Earlier stories collated

1. A little DRASTIC Project you may be able to help with?

We want to collate all references to DRASTIC in academic papers & media articles

Here are a few:

medium article by @emmecola

thorough report by @netpoette@ColinDavdButler 's Paper

Please add any links to this thread. Tks! pic.twitter.com/4ApXIYeDem

— Billy Bostickson \U0001f3f4\U0001f441&\U0001f441 \U0001f193 (@BillyBostickson) January 3, 2021

2. More examples in same thread start here

<https://t.co/DvuC8nyv6g>

3. More References

Papers & Blog Posts by @Harvard2H (Sirotkin & Sirotkin)

260 Questions for WHO collated by @billybostickson

If you find mentions of our individual names or "DRASTIC" in Papers or News, please forward here to this thread as links or screenshots.

— Billy Bostickson \U0001f3f4\U0001f441&\U0001f441 \U0001f193 (@BillyBostickson) January 3, 2021

3. Contributed stories here:

<https://t.co/Mf1KiQm8pl>

2. More References

Papers by @MonaRahalkar and @BahulikarRahul

Papers by @Rossana38510044 and @ydeigin

Medium articles & papers by @gdemaneuf & @Rdemaistre

Papers by @flavinkins (Daoyu Zhang)

Papers by "Anon" & "interneperson"

French News - le Monde

Can anyone remember any more?

— Billy Bostickson \U0001f3f4\U0001f441&\U0001f441 \U0001f193 (@BillyBostickson) January 3, 2021

4. Washington Post (February 5th 2021)

We're still missing the origin story of this pandemic.

China is sitting on the answers.

<https://t.co/N77RUN38vs>

Archived: <https://t.co/FoahR3iSRw>

A critical database went offline

At the core of Dr. Shi's work is a database at the institute. According to research by **DRASTIC**, a network of researchers and scientists, this is the most important bat coronavirus database in China. Overall, it holds records of some 22,000 samples and some of their genetic sequences, including for WIV virus sampling trips going back many years. The institute collected more than 15,000 samples from bats, covering over 1,400 bat viruses. The database holds more than 100 unpublished sequences of bat coronaviruses that could significantly help the probe into the origins of the pandemic.

5. Sky News - DRASTIC Petition on TV

World 'not impressed' by WHO's COVID-19 origins report

<https://t.co/MKMZWk6cM8>

Members [@gdemaneuf](#) and [@MonaRahalkar](#) speak out

World 'not impressed' by the WHO's COVID-19 origins report

14/02/2021 | 12min

The world has not been impressed by the World Health Organisation's decision to include an unlikely theory COVID-19 could have entered Wuhan via frozen food packaging in its upcoming report into the origins of the virus, according to engineer and data scientist and DRASTIC member Gilles Demaneuf.

Mr Demaneuf is part of DRASTIC, a network of researchers and scientists who are joined by a desire to get to the bottom of how COVID-19 originated.

12. Daily Telegraph (UK)

Did the Covid-19 virus really escape from a Wuhan lab?

<https://t.co/4qWnz0rt8v>

Archived:

<https://t.co/HJW7aFEVrf>

This lack of transparency meant that it was left to a group of diligent online sleuths, including scientists in Innsbruck in Austria and Pune in India, a Russian-Canadian biotech entrepreneur, an anonymous Twitter user known as 'The Seeker' and a group going by the name of **DRASTIC**, to fill the gaps. They found the original identity of RaTG13, connected it to the Mojiang mine, located the site of the mine and unearthed a thesis from Kunming Medical University that revealed what had happened to the Mojiang miners.

13. Daily Telegraph (Australia)

<https://t.co/5ZcGNalbZY>

Has anyone got an Archive link for this story?

14. WORLD - DRASTIC ACTION ;)

China places 5 million more under lockdown to stamp out virus cluster

Author: AFP|Update: 12.01.2021 11:32

<https://t.co/WGhsQDmTrF>

The screenshot shows the RTL Today news website. The header is red with the RTL logo and 'TODAY' text. Navigation links include Home, News, Luxembourg, World, Fact Check, Business + Tech, Think Lab, and Science + Environment. The main headline is 'China places 5 million more under lockdown to stamp out virus cluster' with a sub-headline 'WORLD - DRASTIC ACTION'. The author is AFP and the update time is 12.01.2021 11:32.

WORLD - DRASTIC ACTION

China places 5 million more under lockdown to stamp out virus cluster

Author: AFP | Update: 12.01.2021 11:32

15. WHO Let the Dogs out on the COVID-19 Origins

By Joshua Cawthorpe, December 17, 2020

<https://t.co/rszYtL4fW5>

WHO knows, maybe?

Why are Anal Swab COVID-19 Tests a Thing in China?

Drastic times, call for drastic measures.

16. WION NEWS

Are the global scientific elite trying to bury the truth about the origin of Covid-19?

Written By: Lawrence Sellin

Washington Published: Oct 05, 2020, 11.48 AM(IST)

<https://t.co/qcSyzEVjL3>

An ad hoc group of scientific investigators known as **DRASTIC** have compiled a 36-point list to buttress their claim that the COVID-19 virus could have originated in a vaccine development program.

17. Daily Mail (finally) after nicking our research during 2020

<https://t.co/rP5p5pCpkY>

Finally, The Daily Mail mentions **#DRASTIC** in an article which confirms our October surprise theory, based on new molecular epidemiology modelling research from Temple University, Philadelphia. <https://t.co/CQcK9bnoxJ>

18. DRASTIC got a mention in the Daily Telegraph Article

But in the first installment we were "disappeared" in favour of others whose name shall not be mentioned

Could COVID-19 Have Escaped from a Lab?

by ROWAN JACOBSEN· 9/9/2020, 9:29 a.m

<https://t.co/nLA1fMLIVn>

This lack of transparency meant that it was left to a group of diligent online sleuths, including scientists in Innsbruck in Austria and Pune in India, a Russian-Canadian biotech entrepreneur, an anonymous Twitter user known as ‘The Seeker’ and a group going by the name of **DRASTIC**, to fill the gaps. They found the original identity of RaTG13, connected it to the Mojiang mine, located the site of the mine and unearthed a thesis from Kunming Medical University that revealed what had happened to the Mojiang miners.

19. Nice to be acknowledge even if we don't get paid ;)

The genetic structure of SARS-CoV-2 does not rule out a laboratory origin

SARS-CoV-2 chimeric structure and furin cleavage site might be the result of genetic manipulation

Rossana Segreto Yuri Deigin

<https://t.co/6NiFQkixnO>

ACKNOWLEDGMENTS

We are very grateful to Prof. Allan Krill (NTNU) for proof reading the manuscript, all the valuable comments and being open-minded about controversial hypotheses; Prof. Heribert Insam (Head of the Department of Microbiology; University of Innsbruck) for his support and Dr. Lawrence Sellin for all the useful information. A special thanks goes to Dr. Fernando Castro-Chavez (former Post-Doc at the New York Medical College) for his support with Research Gate. We are very thankful to René Bergelt, for having discovered the database that confirmed our finding that BtCoV4991 and RaTG13 refer to the same sample. Finally, we are extremely grateful to members of the D.R.A.S.T.I.C. (Decentralised Radical Autonomous Search Team Investigating COVID-19) Twitter group for all their work in uncovering many previously unpublished facts about SARS-CoV-2 and its relative strains. In particular, we are grateful to Luigi Warren for continuously probing the possible connection of the 2012 Mojiang pneumonia outbreak to WIV and SARS-CoV-2, to @TheSeeker268 for finding Chinese-language 2013 Xu MSc and 2016 Huang PhD theses, which have confirmed the SARS-like viral nature of the 2012 Mojiang pneumonia outbreak and have elucidated WIV's role in investigating that outbreak,^{xxiv} including WIV's collection of the 4991/RaTG13 strain from the Mojiang mine, and to Francisco de Asis de Ribera Martin for providing us the English translation of the two theses, and also discovering the RaTG13 amplicon dates.
