Thread:

Since the early days of the pandemic, it became clear that 'health passports' would be implemented & in recent months, the reality of what we're facing is getting clearer.

Make no mistake: The voluntary #VaccinePassports rolling out are just the tip of the iceberg.

2.

These passes, once mandatory will restrict our ability to move about & engage in social activities if unvaccinated, we may even face financial penalties. Even our ability to obtain employment will ultimately be based on some medical decisions.

https://t.co/881JmZc9tz

3.

Evidence can be found in an announcement that IBM's Digital Health Pass will be integrated into Salesforce's https://t.co/HQTkCPkoks platform 'to help businesses, schools and governments verify vaccine & health status.'

https://t.co/eq2DcCMbE8

4.

If you want to have the ability to shop, socialize, get an education or work, you'll have to hand over your biological data & risk score for the medical & data technocracy to do with what it will. It's hard to imagine a less free society than this.

5.

This collaboration will focus on exploring the utility of IBM capabilities in the US, such as the recently unveiled pilot program for a COVID-19 Digital Health Pass in New York, which sets up businesses to enforce government regulations.

https://t.co/U4MjXrJU69

6.

Right now, #VaccinePassports will be voluntary, but IBM is already looking at the Excelsior Pass asthe model for what it predicts will be a mandatory digital #VaccinePassport in the future.

7.

IBM’s presence in law enforcement is one of its largest providers of digital profiling technologies & #AI policing systems in the world, which may also help with any obstacles Moderna face among vaccine-hesitant populations.

8.

'DNA is a single point of data convergence across humanity & allows for these new moral economic models to generate enough volume to replicate present-day economies of scale & design financial instruments to exploit human beings at a cellular level.'

https://t.co/eq2DcCMbE8

9.

Tal Zacks, the former chief medical officer at Moderna, gave a Ted Talk in which he explained that the company’s mRNA “information technology” is contrary to current denials, designed to manipulate human genetic code.

https://t.co/Hzm6kOWKcx

10.

‘We’re in the business of building a large database,’ Perkins reveals with CommonPass, Perkins is continuing to do all he can to build this database. A biometric passport required at all ports of entry would go a long way to procuring a goldmine of real time genomic data.”

11.

It’s now beyond clear that COVID-19 is being used as the justification for the implementation of a new identity & social system that have been decades in the making.

Their goal is to digitize you & your family, & convert everyone into digital assets.

12.

Once implemented the control system will be fully automated. To use the #VaccinePassports as an example, say you miss your vaccination. The system will know you didn't show up & access to travel & banking might be cut off until it registers that you got your inoculation.

13.

There doesn't need to be any humans involved, your body, health records, geo-location, activities & financials are all connected & trackable in real time by #AI that analyzes everything we do.

14.

The elite need us to passively acquiesce, because there are far more of us than there are of them. That's what pandemic measures are achieving. We're growing to accept work, travel restrictions. Growing to accept where and how we can holiday & with whom.

15.

Segregating society into classes based on vaccination status achieves nothing but except the willful destruction of our freedoms.

By tying healthcare into the digital surveillance apparatus, we end up with a very robust platform for automated mass control.

16.

While government's have a duty to protect the health and welfare of its citizens, this duty must be balanced against the loss of individual rights and liberties.

The next step is to introduce bi/tri weekly testing.

https://t.co/kgaMKn0jx2

17.

And then tie the results to a mandatory check-in system for social events and soon to be work places via a Covid Status Certification via the NHS App. Either way tested or vaccinated will get you in.
