Did you know ?

Samveda is smallest of 4 Vedas.

There are 1875 mantras in Samveda out of which most are of Rigveda.

Few are from Atharva Veda and Yajurveda.

There are about 1000 shakhas in it like Jaiminiye, Kaumuthiye and much more.

Many Sages, saints and gurus have said that Shlokas of Samveda are coded and if they will be extracted, Samveda will become much larger in size in terms of number of Shlokas

Even Krishna has said "In Vedas, I'm Saamveda." The Shlokas in Samveda are related to Music, Medicine, art and much more.

Facts:

Few Mantras in Samveda are so strong that chanting them in proper way can cure your diseases.

There are few Mantras which assert the Scientific acumen of Vedic Sages. For example, one such Mantra talks that Moon doesn't have its own light and it reflects the light of sun.

The Shlokas talk in detail about Raag, musical instruments, Musical sounds, and such more.

The Shlokas are used in Yagna and have immense energy which can be used effectively.

Thanks
