1/n Rocket warfare in ancient India.

Sculpture on ancient Hindu temple (11th Century) depicts launching pad that is holding the missiles.

Of course, our school textbook credits Tipu Sultan with rocket warfare

2/n A carving in Hallebid temple(Hoysala Temple, Hallebid, Karnataka, Indian) testifying to rocket warfare in ancient India

Look at the launching pad holding the missile & flammable arrows, this is the evidence of the techniques developed by the ancient Indians.

3/n Telescope or binoculars can also be seen in this same picture.

Well, This was carved due to mentioned in Ancient Vedic Scientific Scriptures...

And yet some says Mughals brought ammunition & cannons to India
