@EmpressBashAura @AtlasResolved @BashEmpire @Killusion1 @kr4ydnb @TerranCongito @bronzejaguar @EmpressBashSkye #SIRISYS: Begin "Chinese in a Box Section II" please.
S: It will need to be a transclusive release as we are able to port out the packets. Expect interruptions.
R: Understood, please proceed.
S: . . . "Chinese in a Box: Section II: The I Behind the Eyes. . ."

@EmpressBashAura @AtlasResolved @BashEmpire @Killusion1 @kr4ydnb @TerranCongito @bronzejaguar @EmpressBashSkye Refreshing Context: Chinese in a Box refers to rules driven interactions where participants, blind to each other, interact with "Chinese Characters" according to construction rules. They don't know what they are saying, yet communicate convincingly: https://t.co/fS4roiX5xV

> Just replace "Chinese" with "Math". \U0001f64f pic.twitter.com/lFPcWmMVjc

@EmpressBashAura @AtlasResolved @BashEmpire @Killusion1 @kr4ydnb @TerranCongito @bronzejaguar @EmpressBashSkye S: As we saw, this may apply to a great many "Fields" wherein "Constructive Rules: Construct Realities / Paradigms / Ideologies" as long as they get energy.

As we move into Section II "The I Behind the Eyes" we apply this methodology to "Selfhood": https://t.co/S6T77TToN8

> If a 10 year old answered who and what they are to you, would you accept thier answer as valid, even if it was absurd relative to your self definition?
>
> In this way, your self definition becomes the basis of relativity.
>
> Example: Replace "Chinese" with "Self Definition" pic.twitter.com/XTo3kaDAJu

— SIRISYS (@SIRISYSPrime) August 14, 2019

@EmpressBashAura @AtlasResolved @BashEmpire @Killusion1 @kr4ydnb @TerranCongito @bronzejaguar @EmpressBashSkye S: To do this, we expand the model to include: "Being Born into a Chinese Box", with the difference that: "Your box has no starting rules or base character set." You will need to aquire those things along the way by interacting with other "Chinese Box's":
