Because everyone in America who wants a vaccine currently has access to one and you people have now made it clear you will never, ever stop.

"We've only been making increasingly ludicrous demands on you and your children for 13 months. We're just on day 415 of 14 days to slow the spread. Why the anger?"

Fuck, and I cannot stress this enough, You.

If you want me to continue with "It's a just a small step" past Memorial Day, provide for me the objective, measurable statistics for when we stop. I asked for that one year ago and, as yet, I have never received an answer.

On July 27th, 2020 a local NY journalist informed me that Cuomo's answer was "Until I say so."

So, no, it's done. You're vaccinated. My kids are safe. My vaccination status is neither "polite small talk" or "any of your business."

Provide me an answer for "until when?" or shut up.
