India as a nation has many states, to be precise 28 states & 8 UT. Off late personally I see many posts across SM that Modi Failed and has to be brought to his knees for having proven unsuccessful.

I request people to understand this toxic narrow-mindedness agenda to overthrow the Hinduist Prime Minister Narendra Modi and his government from the power of this country at any cost.

Why out of 28 states we have deaths only in Non-BJP Ruled States? We have the ruling govt. from Maharashtra quoting they had wasted around 5.5 lakhs dose of vaccines and keeping that in mind yesterday ,

the shocking & treacherous truth was exposed in the court that Kejriwal government kept hiding 52000 doses of remdesivir injection and kept talking about only 2500 injections. But the truth came out in court.

Also, Kejri government closed the factory which supply x500-cylinder oxygen daily in Delhi, which is craving for a single drop of oxygen, without any reason's

Also, we need to read between the lines – we have Mr. Chidambaram from the left tempted the people of the country should take to the streets and revolt at the current situation. Going with this trend,

I request the common lot keeping aside their interests to keep calm as we have a leader amongst us who's there to deal with the things in his own style. Modi is there to break the right way, in the way.
