If you want to do a Masters/PhD in Canada, and you really need a scholarship, you should consider applying to these 15 schools. (We call them U15).

Below, you will see links to ALL the Masters/PhD programs they have.

Check the requirements, apply, and share with others.

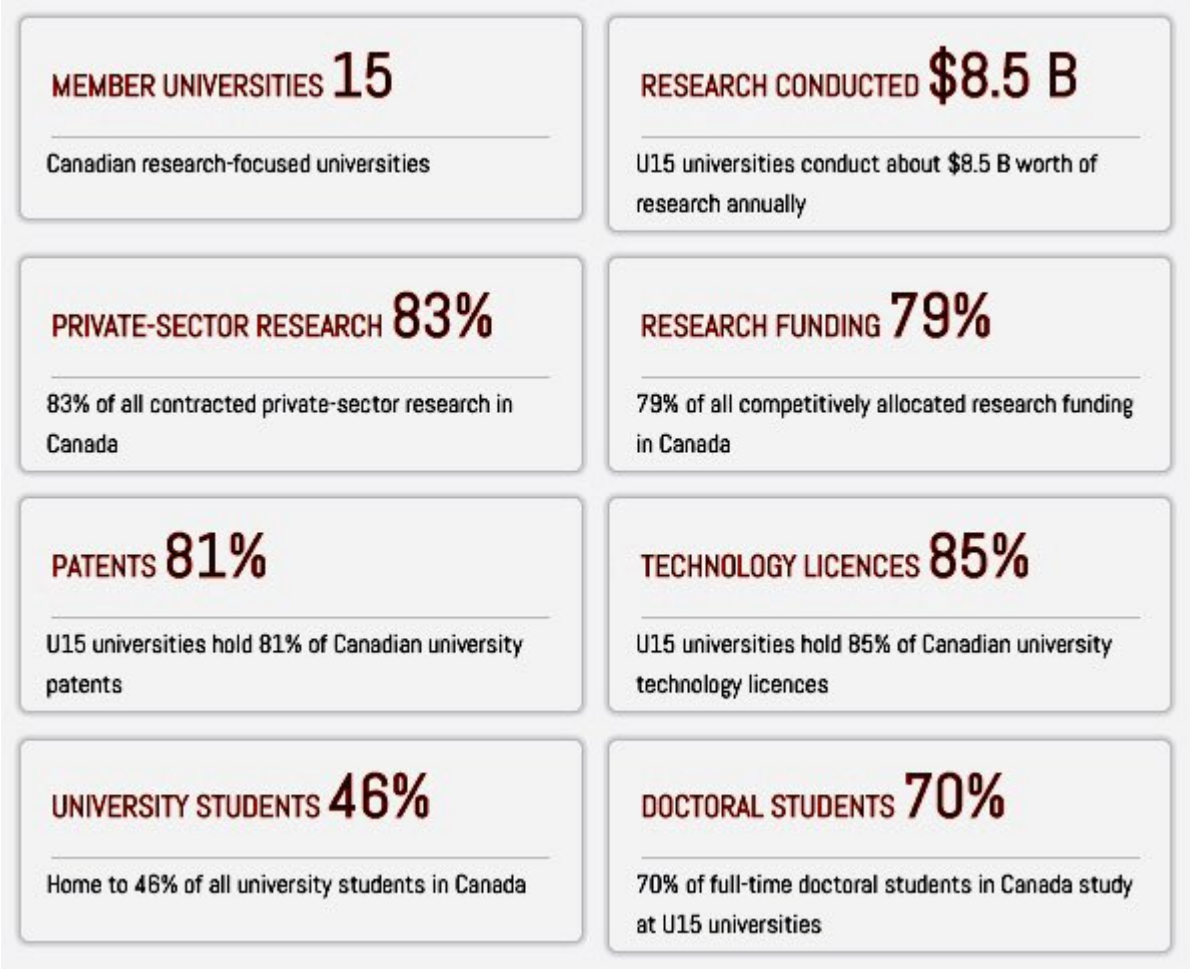
There are entrance scholarships in most (if not all) of the schools, and you don't need a separate application for this.

- You are considered based on info/docs submitted for admission
- The scholarship condition, amount, and availability may depend on the program applied for.

The U15 are Canada's heavy-pocket universities. They

- Receive 79% of all allocated funding
- Undertake 80% of all Canadian research worth $8.5 billion yearly
- Contribute more than $36 billion to the Canadian economy yearly
- Produce more than 75% of all Doctorates awarded.



U15 are your go-to universities for scholarships in Canada. They are:

While these are not the only universities in Canada, they are schools that will increase your chances of getting a scholarship

Other schools you can check are Memorial Uni, Acadia Uni, Simon Fraser Uni, etc

Check the program requirements, prepare a strong application & apply!

If you are looking for information on how to prepare a strong application, I made this study in Canada thread a few months ago, you will find useful information there too.

Cheers
