7 GitHub Repositories (Self Taught) Developers Must Follow

A Thread ■

1. Free Programming Books

This repository contains tons of free programming books. It has grown to become one of GitHub's most popular repositories, with 160,000+ stars, 6000+ commits, 1600+ contributors, and 39,000+ forks.

https://t.co/f2zvKU2hmb

2. Coding Interview University

This is a multi-month study plan for going from web developer (self-taught, no CS degree) to software engineer for a large company.

https://t.co/XhSiW4mIQS

3. Developer Roadmap

Here you will find a set of charts demonstrating the paths that you can take and the technologies that you would want to adopt in order to become a frontend, backend or a devops.

https://t.co/QbsvuJXKji

4. Awesome

https://t.co/eigjCMGGTd

5. Public APIs

This repository contains a collective list of free APIs for use in software and web development.

https://t.co/NiPE36ZXbE

6. You Don't Know JS

This is a series of books diving deep into the core mechanisms of the JavaScript language.

https://t.co/VaNOS3zdzz

7. Freecodecamp

FreeCodeCamp is a friendly community to learn to code for free. Their full-stack web development and machine learning curriculum is completely free. They have thousands of interactive coding challenges to help you expand your skills.
