5 JavaScript Animation Libraries Every Web Developer Should Know

A Thread ■■

1. Swiper

Swiper is the most modern free mobile touch slider with hardware accelerated transitions and amazing native behavior. It is intended to be used in mobile websites, mobile web apps, and mobile native/hybrid apps.

(<https://t.co/PT8RE7Qu0r>)

2. GreenSock

The GreenSock Animation Platform (GSAP for short) is a powerful JavaScript library that enables front-end developers and designers to create robust timeline based animations.

(<https://t.co/nqblBLZ6Kt>)

3. AOS Library

AOS - Animate on scroll library. It has no other dependencies, which helps to keep your website's performance under control.

(<https://t.co/BcmybGPUP1>)

4. Three.js

Three.js is a cross-browser JavaScript library and application programming interface used to create and display animated 3D computer graphics in a web browser using WebGL.

(<https://t.co/cnS68Z2GcV>)

5. Splide

Splide is a lightweight, powerful and flexible slider and carousel, written in pure JavaScript without any dependencies.

(<https://t.co/k7KxaQIAkX>)

Thank you for Reading■

I'm sharing more such post on Instagram too. If you're on Instagram, Please consider supporting my work there too ■
