# Brahma Padartha

Jara who was apologetic about his mistake of killing Shri Krishna placed this precious illuminating Device on a log and left it in a river. It was spotted by King 'Indradhyumna' who preserved it in a temple idol and structure which is now called Shri Jagannath temple, Puri ■■

The startling fact is that the magnetic remote sensing, self-powered device of 'Shree Krishna' is supremely alive, it is an ethereal, self-powering 'Fusion Reactor' and functions like an 'ARC Radiator'

Every 12 or 19 years device is transferred from the old idol to new one by the head priest of the temple, who conducts the ceremony, blindfolded. The temple premises are shut and electricity supply to the entire city is cut off for an hour as the device emits cosmic energy

This is the reason idols here aren't made of stone here as they are made of wood as wood is a poor conductor of electricity. The device tends to give electric shocks even today and it's safer to be placed in a wooden idol ..

These untold stories of Bharat must be thoroughly researched and widely publicised. Bharat needs to realise the true power of its mystical spiritual tradition of Ancients empowered by the 'Sanatana Dharma', the eternal code of life■■■■
