[@DONVESH](#)

I spent \$1000s on software apps in the past 1 year

Here are the top 11 you'd love if you want to start your own agency and make money online

Thread

1/ Notion

For all my writing, SOPs, documentation, drafts, summaries, notes, everything

[@NotionHQ](#) is THE BEST out there.

If I had to choose just one app from this list, it would be Notion.

2/ Carrd

I use [@carrd](#) for so many 1 page websites that's I won't even count

Simple to use easy landing page builder with no learning curve

You can signup now and have a simple landing page published within 30 minutes

3/ Go High Level

I use [@gohighlevel](#) for everything from managing leads in the pipeline to sending emails and text messages.

If you have any kind of agency or use any other CRM, just signup to high-level today and replace like 10 apps by one.

4/ Figma

If you need to make any kind of graphic, just use Figma.

So much easier than photoshop and really powerful!

5/ Slack

If you have any kind of team, just use slack for communication.

The automation, integrations and multiple channels keep everything clean and organized.

6/Loom

There was a time when I was on zoom like 7 hours a day talking to team and clients

Showing results, discussing problems, etc

That 7 hours is now less than 1-hour thanks to loom.

7/ Testimonial

I use this to collect, store & host all your testimonials, video & text in one place.

@damengchen has made an awesome software with beautiful UI!

8/ Kleanleads & Contactecom

Literally, the best scraping software out there if you want to get emails of:

1. Anyone on LinkedIn
2. Local businesses
3. Ecom stores

@blackhatwizardd has nailed it with these apps.

9/ Leadlink

@THETYFRANKEL solved all my pain points from a LinkedIn outreach software and it's so good!

@HiLeadLink is a beast if you want to use LinkedIn to get clients for your business.

10/ Uplead

I'm doing most of the outreach right now to enterprises and \$10MM+ companies.

So if you ever need to do outreach to the whales and want high-quality leads, get uplead.

11/ Otter

I transcribe all my meetings and voice notes and import them to a single notion database.

You can literally press Ctrl+P or Cmd+P and search from 100s of hours of meetings, and voice notes within seconds.

Get the roadmap if you want a step-by-step guide to start & scale your online business to \$25k/month and beyond
