Share your startup - September 2018

Tell us about your startup!

/r/startups wants to hear what you're working on! Contest mode is on, so remember to select 'Show All' to see all the replies. If you don't see your post, you probably need to load more comments at the bottom. Also, all posts are sorted randomly, so the sort function doesn't seem to work.

- Name / URL
- Location of Your Headquarters
- Elevator Pitch/Explainer Video
- More details: What stage are you in? How many employees or founders?
- Are you looking for anything? (Feedback/Hiring/Investment)
- Discount for /r/startup subscribers?
- Join the [/r/startups discord for instant chat, advice, and emotional support!] (<https://discord.gg/yjMZU8g> "/r/startups discord") Discord is similar to slack, but anyone can join easily and anonymously.

Reddit: Pushshift

Pushshift is a big-data storage and analytics project.

Most people know it for its copy of reddit comments and submissions.

<https://t.co/ne0XgKlt9A>

Reddit: Pushshift API

The <https://t.co/HWZNWEvrXy> Reddit API was designed and created by the /r/datasets mod team to help provide enhanced functionality and search capabilities for searching Reddit comments and submissions.

<https://t.co/FkUE7R2jlb>

Reddit: Pushshift file download

Note: The latest data for manual download is from April 2020

Reddit: PMAW: Pushshift Multithread API Wrapper

PMAW is an ultra minimalist wrapper for the Pushshift API which uses multithreading to retrieve Reddit comments and submissions.

If you pull data via Pushshift use PMAW, highly recommended!

<https://t.co/xSlaX3Di6T>

PMAW: Pushshift Multithread API Wrapper

pypi v1.1.0

python 3.5 | 3.6 | 3.7 | 3.8 | 3.9

License MIT

Search Comments

```
api = PushshiftAPI()
comments = api.search_comments(subreddit="science", limit=1000)
comment_list = [comment for comment in comments]
```

Search Comments by IDs

```
api = PushshiftAPI()
comment_ids = ['gjacwx5', 'gjad2l6', 'gjadatw', 'gjadc7w', 'gjadcwh',
               'gjadgd7', 'gjadlbc', 'gjadnoc', 'gjadog1', 'gjadphb']
comments = api.search_comments(ids=comment_ids)
comment_list = [comment for comment in comments]
```

Twitter: Tweepy Twitter for Python!

An easy-to-use Python library for accessing the Twitter API.

Note: The downside is the API limitations of Twitter, so you need a lot of time.

<https://t.co/dhc7x1IZ8U>

Tweepy: Twitter for Python!

Installation

The easiest way to install the latest version from PyPI is by using pip:

```
pip install tweepy
```

Twitter: Script

Most twitter scraper are banned by Twitter or no longer work so here is a simple and unlimited twitter scraper with python and without authentication

Note: Headless mode no longer work and it uses Selenium to access Twitter

<https://t.co/feZsbOFmJR>

Facebook: Scrape Facebook public pages without an API key.

\$ pip install facebook-scraper

<https://t.co/Rh4s93P1YD>

Nodes represent official Facebook pages while the links are mutual likes between sites.

Node features are extracted from the site descriptions that the page owners created to summarize the purpose of the site.

<https://t.co/tLSvGA95Az>

❖ Social networks

Name	Type	Nodes	Edges	Description
ego-Facebook	Undirected	4,039	88,234	Social circles from Facebook (anonymized)

soc-sign-bitcoin-alpha	Weighted, Signed, Directed, Temporal	3,783	24,186	Bitcoin Alpha web of trust network
comm-f2f-Resistance	Weighted, Directed, Temporal	451	3,126,993	Dynamic face-to-face interaction network between group of people
musae-twitch	Undirected	34,118	429,113	Social networks of Twitch users.
musae-facebook	Undirected	22,470	171,002	Facebook page-page network with page names.
act-mooc	Bipartite, Directed, Attributed, Temporal	7,143	411,749	Student actions on a MOOC platform, with student drop-out binary labels.
musae-github	Undirected	37,700	289,003	Social network of Github developers.
feather-deezer-social	Undirected	28,281	92,752	Social network of Deezer users from Europe.
feather-lastfm-social	Undirected	7,624	27,806	Social network of LastFM users from Asia.

Octoparse: Easy Web Scrapping for Anyone

Everything you need to automate your web scraping.

Note: It's a paid service.

<https://t.co/f0bBLpkxSZ>

The screenshot displays the Octoparse web interface. At the top, there are buttons for 'Save', 'Start extraction', and 'Setting'. The main workspace on the left shows a workflow diagram with a single step labeled 'Go To Web Page'. On the right, the configuration panel for this step is visible, showing the 'Page Url' as 'https://www.reddit.com/r/startups/'. Below this, there are sections for 'Advanced options' (including 'Block Pop-up', 'Scroll Down', and 'Clear cache') and 'Retry' settings. The bottom of the interface shows a preview of the target website, which is the subreddit 'r/startups' on Reddit. The preview includes the subreddit header, a search bar, and a list of posts. A red 'BACK TO TOP' button is visible in the bottom right corner of the preview area.

Spread the open source love!

If you know an amazing project drop me message [@philipvollet](#)

we need this edit function. my inner zen isn't balanced every time i spot a typo
