**How to trade on Expiry day with Nifty straddle?  
(System trading on Expiry)**

**Triple straddle is one of the best and accurate methods for expiry day**

**If nifty trading at 15720 then will sell three straddles above 50 points from ATM,  
below 50 points and ATM.**

Ex.

Sell straddle 15700(ATM), 15650(ATM-50), 15750 (ATM+50)

Stoploss of 80% on every leg and run your trade till 3 PM

Once SL hit in any Leg just keep holding other leg till expiry with SL (Never or less chance to hit both SL on expiry day)

Trading timing at 9:20 the Morning
