All those who are facing problem in making money in low vix this one is for u. On Friday straddles open arnd 550-600. To make 5% Roi monthly all u need is to make 10 pts daily and for 10% u need 20 pts while doing spreads..

So be I think we still have enough room to make money.

So to earn even 10% all u need is 100 pts on weekly basis. So now u can do it either positionally or intraday whatever suits u. Try to learn the tricks of trade and then u have all the money out there.
Don't try to copy anyone.. just figure out what u are comfortable at
