This is Akbar's mausoleum at Sikandra, Agra.

Just minute!

This is not to share about how beautiful the Mughal Architecture is or how beautiful the Tomb of AKBAR THE GREAT (as they say) ■■■

First thing that I found unusual is..

That he made his Tomb many years before he died.. ■■■■

Ye bat ap logo ko ajeeb nahi lagi??

History of Akbar's Tomb

Emperor Akbar while he was alive selected the place for his final resting place, the design of the gardens around the tomb and took care of the construction of his own tomb. While the entire tomb was constructed and Akbar lived through it, his son, **Emperor Jehangir famously known as Prince Salim** constructed a floor of marble stone over the structure. Thus, he completed the structure of his Emperor father's tomb.

Now tell me one thing.. his son Jehangir completed the structure by adding "White minarets" ■■

Does it make any sense?!

Chalo ek bar ko mante hain ki kisi hindu structure ko zabardasti Akbar ka tomb nahi banaya..

Jehangir unkil color combination ka dhyan to rakha hota ■■

Ab zara kuch architectural details par dhyan dijiyega..

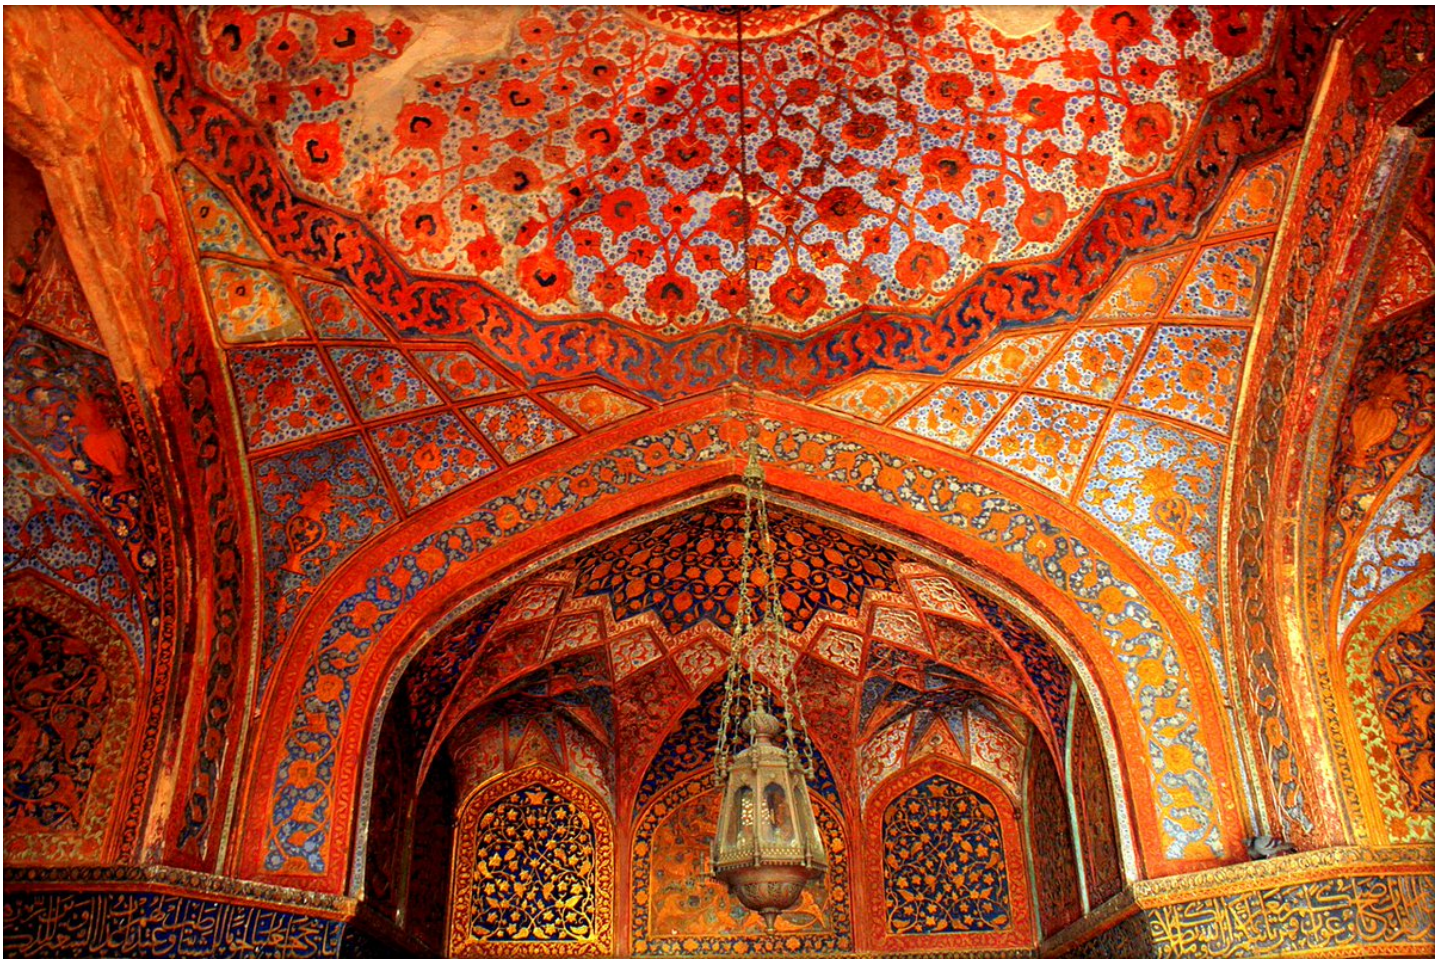

Two pictures of same place.. second pic is a closure view..

Kalash nazar aya??

Mausoleum me kalash ka kya kaam..

Aur kya Mughal Architecture me kalash banate hain?!

Think!

Ab ye Mausoleum me Swastika design q ■?!

A key attraction is the design of a Hindu Swastika.
