Less researching, more coding

We picked the best tools, libraries and frameworks so you don't have to. Get started now with one of our project templates.

4 Pipedream

Pipedream is a low code integration platform for developers that allows you to connect APIs remarkably fast.

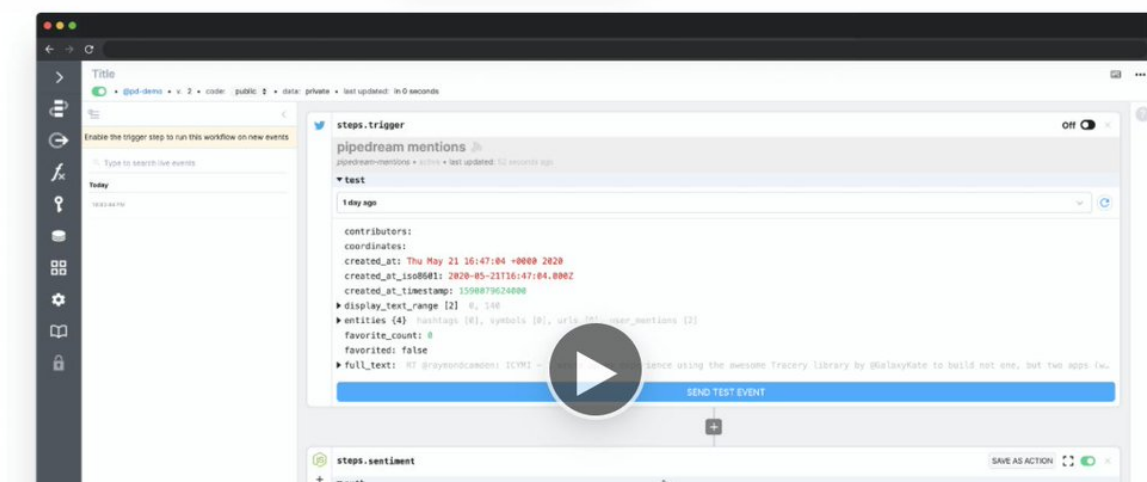

https://t.co/DamFHMe8sy

Connect APIs, remarkably fast.

Stop writing boilerplate code, struggling with authentication and managing infrastructure. Start connecting APIs with code-level control when you need it — and no code when you don't.

7 DevSamples

DevSamples is a list of code samples for you to copy and paste into your projects as needed.

https://t.co/dYE30K3OJT

DevSamples

CSS

Forcing Line Breaks with CSS

Prevent lines of text such as long URLs from overflowing by forcing a line or word break.

CSS

BEM CSS Methodology Example

A few code snippets demonstrating how to use the BEM methodology for CSS.

JAVASCRIPT

Removing Numbers from a String Using Javascript

A small Javascript example demonstrating how to remove all numbers from string.

CSS FLEXBOX

Grow a Flexbox Element Relative to Other Elements

A code snippet showing how to use the flex-grow property to make a flexbox child item larger, relative to the other flex items.

JAVASCRIPT

Generate Random Numbers with Javascript

Some small functions to show you how to generate random numbers in a certain range.

JAVASCRIPT REACT NATIVE

Disabling Warning Messages in React Native

A small code snippet that will suppress the yellow warning messages from showing up in React Native.

HTML JAVASCRIPT

Disabling Browser Autofill on Form Input Fields

A few different methods to prevent autocomplete on forms.

JAVASCRIPT JQUERY

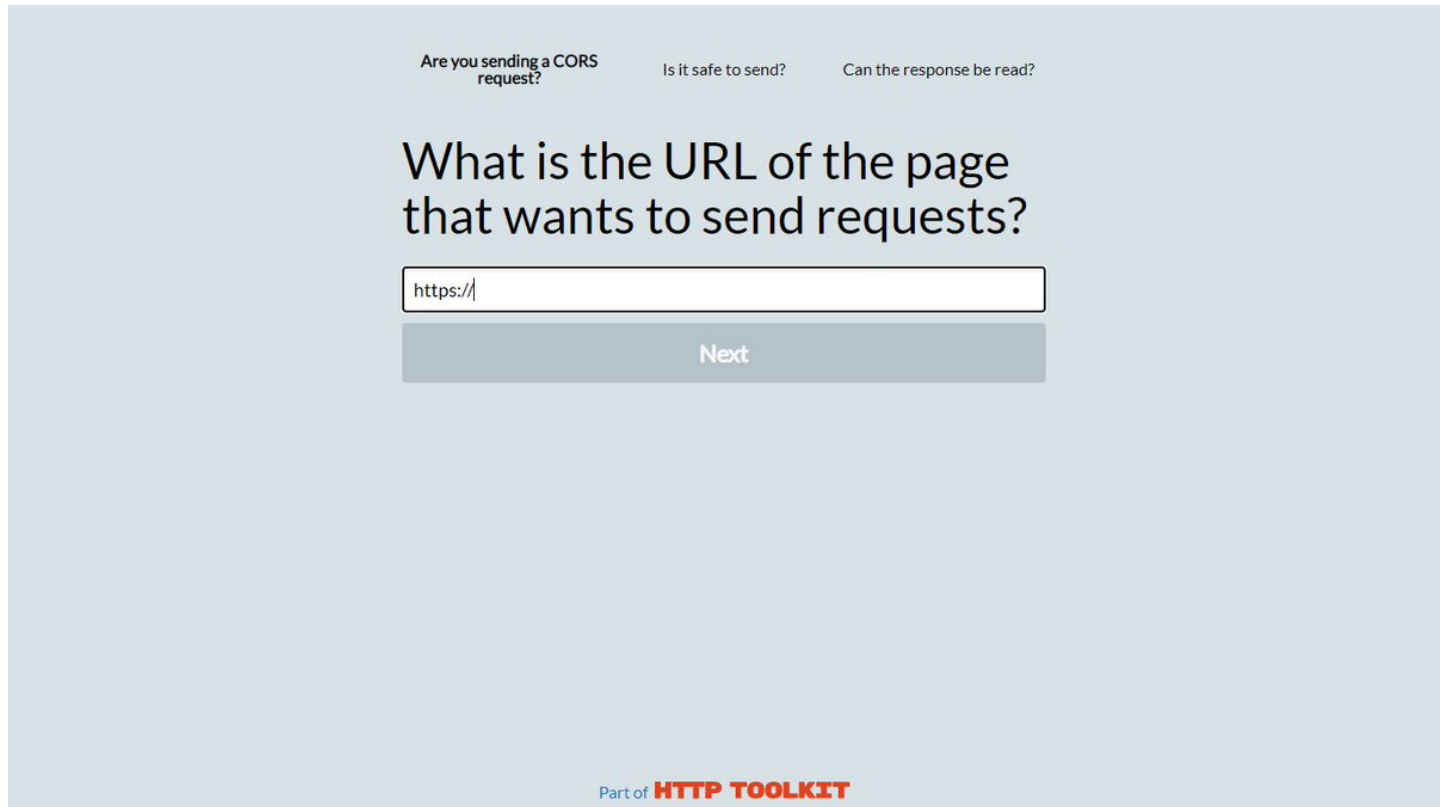

Get the Size of the Window with Javascript and JQuery

A couple different ways to get the size of the window or an element with javascript and JQuery.

8 Will it CORS?

Cross-Origin Resource Sharing (CORS) is how browsers decide how web applications can communicate with other services.

https://t.co/plJ0KQNWl3

The screenshot shows a web interface for checking CORS. At the top, there are three questions: "Are you sending a CORS request?", "Is it safe to send?", and "Can the response be read?". Below these is a large heading: "What is the URL of the page that wants to send requests?". Under the heading is a text input field containing "https://". Below the input field is a button labeled "Next". At the bottom right, it says "Part of HTTP TOOLKIT".

Are you sending a CORS request? Is it safe to send? Can the response be read?

What is the URL of the page that wants to send requests?

https://

Next

Part of **HTTP TOOLKIT**

9 GTmetrix

With GTmetrix you can see how your site performs, reveal why it's slow, and discover optimization opportunities.

https://t.co/uoNbTzsc3h

How fast does your website load? Find out with GTmetrix

See how your site performs, reveal why it's slow and discover optimization opportunities.

Test your site
