Future Breakout Trades -

Mitesh Patel

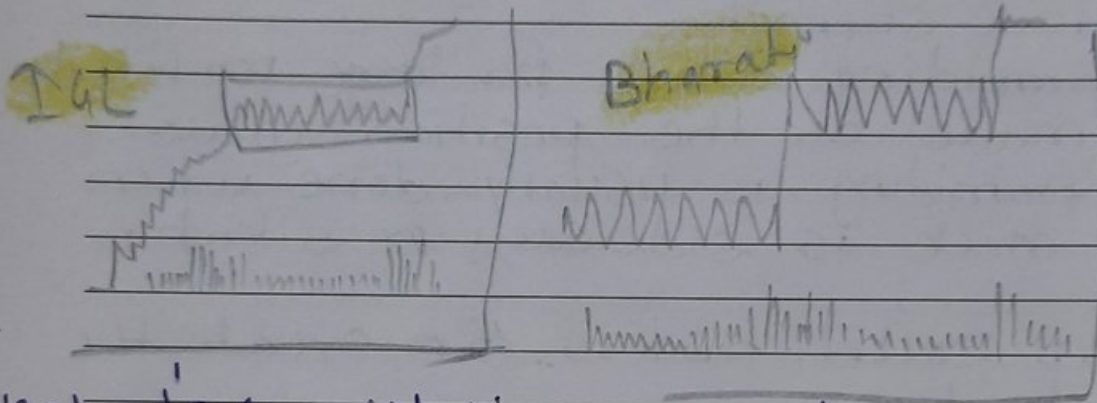

By Aditya Tadmal

- How to pick stocks at right time?
- What to look for?
- Importance of BO post consolidation?
- How to manage SL
- How to get huge profits.
- Multiple examples
- Pyramiding for making an impact on the PF.

* Imp of Trading only BO or BD stocks by -

- Two questions to always ask,
 - 1) Why stock is going up/down & when?
 - 2) Who is behind big up/down & when?
- Trade only stocks with Momentum
- Instant results
- Small SL or huge profits.
- Everyday all stocks will not up/down more than 4-5%.
- If all stock move in the same 1% range then the index will also move by same velocity & that's not possible,
Mext SAZO Oxcq Lefuma

- IGL example is a textbook example.
- Bharti example look for volumes in downmove.
- Less volume during downmove
- Gives conviction for further uptrend.

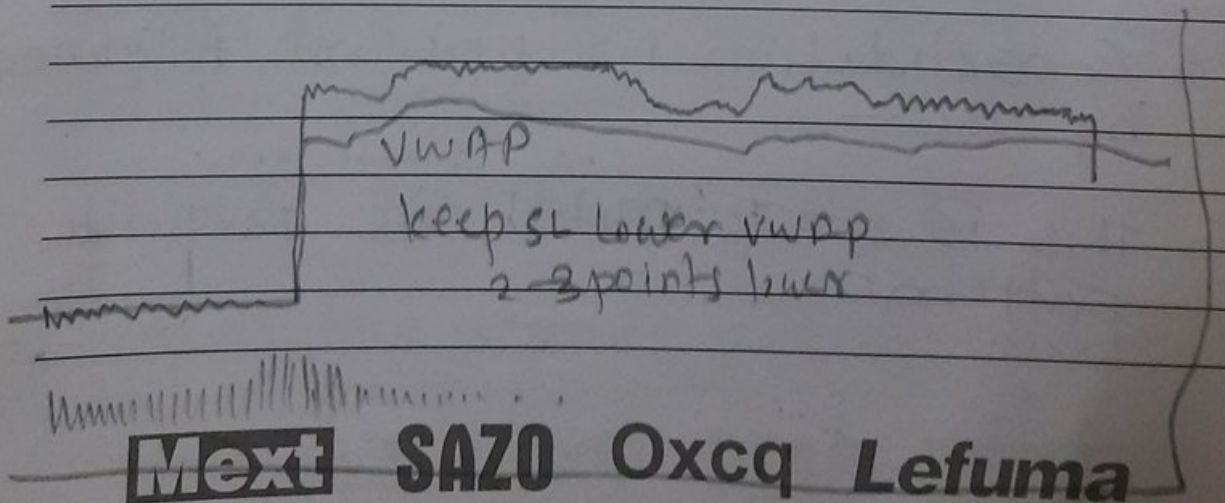

Uptrend & Consolidation
then Breakout

consolidation in
uptrend.

* Tech Mahindra trade of explained -

- Tech M was consolidating near higher levels.
- Gapped up with huge volumes.
- Operators in total control.

Thank u.

Happy learning to Everyone.

- If stock reverses sell calls.
- Ready to short futures too if reverses.
- Follow the market.

Made around 3.7 lakh profit on a 26L account.

* According to Mitesh sir what to focus on and what to Avoid?

- focus on stop losses & Trailing SL
- Profits will take care of themselves
- Mistake is predicting targets.
- View prevents you to change position.
- He never ever knows tgt.
- Only SL & TSL.

* Warning: Futures Trading is highly risky.

- Venture into it only after you have made decent percentage gain on yr capital.
- try to avoid before that
- Money leaves yr account faster than it comes when u dont know what you are doing in futures.
