There are many strategies in market ■and it's possible to get monthly 4% return consistently if you master ■in one strategy .
One of those strategies which I like is Iron Fly■

Few important points on Iron fly stategy

This is fixed loss■ defined stategy ,so you are aware of your losses . You know your risk ■■and breakeven points to exit the positions.
Risk is defined , so at psychological■ level you are at peace■■■■

How to implement
1. Should be done on Tuesday or Wednesday for next week expiry after 1-2 pm
2. Take view of the market ,looking at daily chart
3. Then do weekly iron fly.
4. No need to hold this till expiry day .

5.Exit it one day before expiry or when you see more than 2% within the week.
5. High vix is preferred for iron fly
6. Can be executed with less capital of 3-5 lakhs .
https://t.co/MYDgWkjYo8 have R:2R so over all it should be good.

8. If you are able to get 6% return monthly ,it means close to 100% return on your capital per annum.

IRON FLY beneficial for :-

People who are in full-time job , cannot sit all day infront of trading screen and planning to get an average of 4-5 % monthly return from market .
