And The NYT calls it! Sex positivity is out.

H/t to the ladies who started ringing this alarm bell first or set the scene for people to notice: myself, @Louise_m_perry, @moveincircles, @kaschuta, @annakhachiyan and MANY others.

The infamous blog post that got quoted by @DouthatNYT:

@moveincircles' brilliant piece on The Sexual Counterrevolution:

@Louise_m_perry has a lot of great work out there, this interview with @kaschuta is a great introduction:

And I would be remiss not to mention Red Scare— an important piece in how discourse has changed. My first exposure to people who weren't explicitly in right wing spaces who were open to critiquing mainstream ideas was RS. It kicked the door open.

And finally, the thread. Often dismissed, this is where I've been tracking subtle shifts in the way regular people talk about sex:

> Canary in the coal mine. Just remember I called it & have been writing about this for a year now.

IS sex positivity falling out of fashion? Who knows, the NYT seems to think so.
