Volume price interpretation -

price increases + volume increases = bull ■

Price decreases + volume increases = bear ■

Price increases + volume decreases = fake upmove) sideways

Price decreases + volume decreases =fake downmove) sideways

1) Always big breakout start with big VOLUME.

The higher the volume +higher the range = higher will be the move.

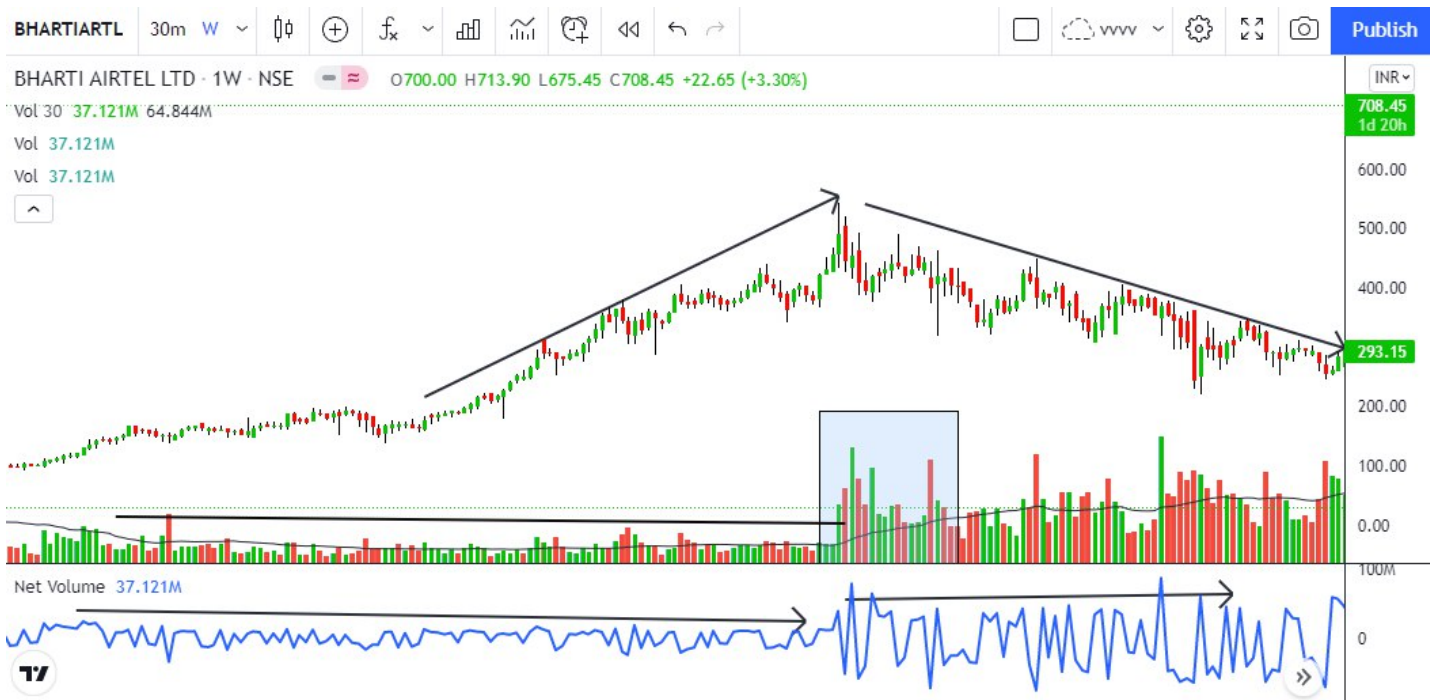

INDIAN RAIL TOUR CORP LTD - 1W - NSE - ≈ O5594.00 H6396.30 L4996.05 C5454.85 -8.70 (-0.16%)  
Vol 30 22.8M 12.749M

2 IN the time of consolidation volumes are lower then upmove &.

3 always trend changing move start with big volume action.

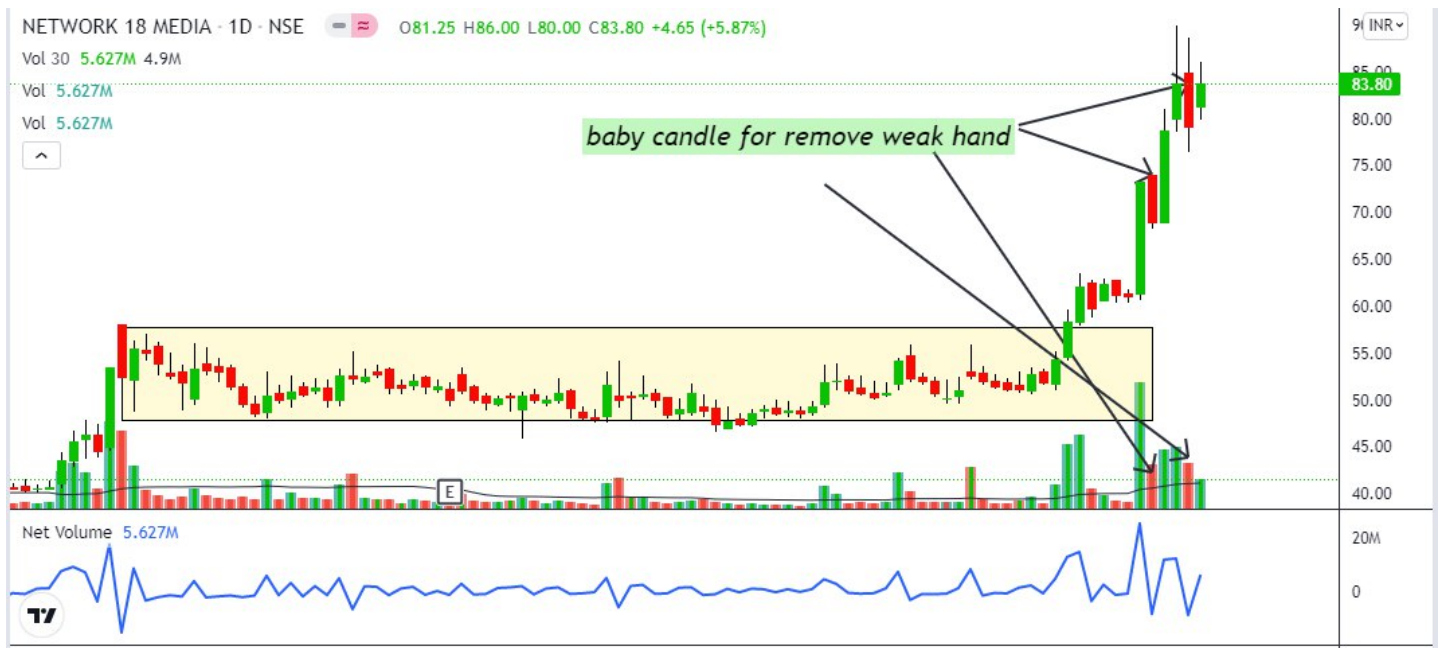

4 ■ strong hand cover their position at highest price & at that time volume is more then 1/2 months .

5 ■ IF during breakout volume is highest then ever then chances of it's multibagger is much more.

6 ■ IF during breakout price formed baby candle then chances of it's further move is much more.

7 ■ IN lower timeframe all rules applies in same ways.

U can watch price & volume action U will learn & earn aolt ■■
