The fact that the Hindu scriptures are open to interpretation and critique is one of their greatest assets. Some of Lord Ram's actions in the Ramayana have been questioned, and some even question if he deserves the reverence and worship he receives.

Sage Valmiki could have easily polished and edited all of Lord Ram's activities that are subject to criticism today and presented him without any so-called defects.

The grandeur of Hindu scriptures is that they do not preach or impose beliefs or views, but rather encourage the reader to analyze, argue, and come to a conclusion.

This is why, after 1000s of years, they are still relevant.
