1. How/When to enter:

This is NOT an exact science, there is no way to avoid fakeouts. These are KEY levels, and for that reason, provide strong moves. However, they can be hard to break due to their significance. You must manage risk.

How to read my watchlists:
https://t.co/E6BgE8lEVz

For those who are new: $CHWY 80c > 77.35 | 74p < 76

Reads: if $CHWY confirms over 77.35, watch 80 strike calls, and if $CHWY confirms under 76, watch 74 strike puts.

Please read this thread before taking any of my plays. \u2b07\ufe0f https://t.co/H93iJw2wFm
