Full chart learning course ■
In single thread ■

Process of trading through
price action ■■

1■Time frame - always start looking chart ■ with higher time frame (weekly/monthly) then after go for lower one .

Positional trader - weekly/monthly

Swing trader - daily /3hours

Intraday trader - 15/30min

2■ demand /supply zone - then draw major/minor demand & supply zone .■■■

Ex : #SIS

3■■ Trading style -

■If you are positional trader then focus on major demand & supply zone.

■If you are swing trader then focus on minor demand & supply zone.

Wait for price to come on it then, ■

4■find consolidation -

■Positional trader - consolidation should be above 1/2years.

■ swing trader - consolidation should be below 1/2 years

■Intraday trader - consolidation should above 5/10 days.

Ex - #galxo / #triveni / #vimta

GLAXO SMITHKLINE P · 1M · NSE ━ ≈ O1548.00 H1824.00 L1531.00 C1757.35 +253.40 (+16.85%)

Vol 30 2.411M 1.32M

major monthly demand zone

5■major flow of market & stock■ -

Major trend of market & stock must match to each other .

(Major trend - monthly higher high)

Ex - #Vtl & #paushak

VTL   30m W   ▯▮ ⊕ ƒx   ⅲ ⁓ ⏲ ◀◀ ↶ ↷   ▢ ◌ vvvv   ⚙ ⤢ ◎   **Publish**

VARDHMAN TEXTILES · 1W · NSE ━ ≈ O1981.00 H2066.55 L1855.00 C1987.80 −11.90 (−0.60%)

trend changing resistance line

6■ Volume action - after that watch volume action near major /minor demand supply zone.

This is my volume thread ■ you will learn about volumes & it's behaviour ■

https://t.co/9xeOjV2U8r

Full #volume anlaysis thread \U0001f9f5

One thing which big player can never hide - VOLUME https://t.co/MjtFq384N0

— Vikrant (@Trading0secrets) October 20, 2021

7■ Pivot Entry point ■ - pivot point is that point in which chances of big move occur is much more.

If stock making good contraction of price near major/minor demand & supply then only enter that trade ■|

Ex - #paushak /// #tatapower

8■ Stoploss - every types of trader must follow sl in any condition because after bull market over only 40% stocks recover.

■positional trader - 20/25% sl

■swing trader - 5/7% sl

■Intraday /btst - 1/2% sl

9■position sizing(RM) - your position size neither too big nor too small .

■Postional trader - allocate 10/15% fund in one stock.

■Swing trader - allocate 20/25% fund

■ Intraday trader - allocate 20/25% fund

All calculation is based on risk management.

■ Targets ■ - targets must be based on good R:R (normally 1:2)

If you simply follow 1:2 then u need to correct 40% time then also u made alot

■Positional - 50/100%

■swing - 15/30%

■Intraday - 3/5%

1■1■ - Trailing sl & partial booking -

trailing sl & partial booking are very important for profit protection .

■Partial booking - IF as per R:R you earn double then sl ,

Then time to book 50% profit.

Rest hold for trail sl cost to cost.■■■

1■2■ Price action lessons - Here is eight price action lesson which came from very years of experiences .

must read ■■

https://t.co/8nEzkbdfDy

Here is the thread\U0001f9f5of

8\u20e3 #priceactions lessons which I learned by my 6\u20e3 years of experiences.

U can apply it any type of stocks.

It is mainly work in bull market \U0001f4c8\U0001f447

Give love \U0001f497 if it enhanced your knowledge \U0001f4da\U0001f64f@Atulsingh_asan
