I turned $500→ $2,200 in 10 days■

Here's how I did it ■

Before we dig into the strategy breakdown, let's first look at the results

In 10 trading days, I turned $500→ $2,200 with only ONE of those days resulting in a loss■

Out of 11 trades, only 2 of them were losses■

I had an 81% win rate. Not too shabby right? ■

To see my daily results (proof), search my name on twitter with the tag #SAC

Ok, let's breakdown the strategy now■

For this challenge, I focused on scalping options using my institutional levels■

(I will have more info on how I find institutional levels in the future)

My goal everyday was to get a quick 10-30% gain and then get out■■■■

For the most part, I succeeded in that. There were only a few times where I got greedy and went for a higher % gain

This strategy made it so I was done for the day in usually an hour after market open■

10 hours MAX of "work" led to ~$1,700 in profit ■

Which stocks did I trade? Look at this thread here ■

https://t.co/E6xv71E9C4

I "focused" on $SPX, but only ended up trading it a few times■■■■

I've taken $500\u2192 $1,415 in 7 days for my small account challenge\U0001f680

Here\u2019s how I found the stocks to trade\u2705

■I do want to mention that this was a “challenge” account.

I would not typically trade a small account like this, using 100% of my buying power on some trades.

I preach risk management, and for this challenge I simply disregarded that aspect of trading (intentionally)■

I simply wanted to see what I could do with $500 playing a little risky and it ended up turning out great■

“So why stop now?” you may ask…

Well, I want to reset to $500 again starting TOMORROW■

So if this thread (first tweet) gets 50 likes + RTs, I’ll reset and start from scratch❤■

Also, I alerted all my trades LIVE in my FREE discord for everyone to join■

If you want to follow along, send me a DM and I’ll invite you to the discord■
