Chaos Agent Steve Bannon announces his creation of a new MAGA cryptocurrency called 'FJB.' "This is eventually going to be used as a means of transactions, you're going to have an alternate currency .. You're going to very quickly have no reliance on their financial system."

Additional info.

In same broadcast, Bannon said that “a portion” of the proceeds he takes in will be donated to the J6 prisoners and their families, the ‘Widows and Orphans Fund,’ and the Police Benevolent Association. (Like his promise to fund completion of the border wall with his last venture)

All the usual suspects are bellying up to the trough to get a piece of the action fleecing the gullible MAGA rubes. It not just a coin, it’s a community!

Was listening to War Room yesterday and decided to get in on $FJB

Like what they are doing by turning it into a community rather than just another coin

Website has a ton of good info too:

[redacted]

Not just about $FJB but about crypto in general

[redacted]

OFFICIAL website of $FJB Let's Go Brandon Coin
